

JANUARY 22, 2026

Kansas Postsecondary Technical Education Authority
Curtis State Office Building
1000 SW Jackson, Suite 520
Topeka, KS 66612

2025-2026
David Reist, Chair
Curtis Sneden, Vice Chair

KANSAS POSTSECONDARY TECHNICAL EDUCATION AUTHORITY MEMBERS:

Dr. Tiffany Anderson	Ray Frederick, Jr.	Cindy Hoover
Keith Humphrey	Debra Mikulka	David Reist
Curtis Sneden	Todd Zimmer	Natalie Clark
Mike Beene	Amber Shultz	

Building a Future

Higher Education's Commitment to Kansas Families, Businesses, and the Economy

1. Helping Kansas families
2. Supporting Kansas businesses
3. Advancing economic prosperity

2025-2026 KANSAS POSTSECONDARY TECHNICAL EDUCATION AUTHORITY GOALS

Goals

- 1) Evaluate the impact of the modernized National Career Cluster Framework implementation on the Kansas postsecondary education system, funding, and reporting. Develop a plan for transfer to the new Framework which aligns with the secondary education system.
- 2) Investigate the active duty and veteran student services in the Kansas postsecondary system, specifically the use of military-originated credit articulation and transfer procedures. Evaluate current military-originated credit data, identify reporting gaps, and develop a set of criteria and recommendations for effective military-originated data collection and reporting.
- 3) Resume program performance reviews using previously established criteria to validate and communicate the value of technical education in developing a skilled workforce and meeting the needs of business and industry.
- 4) Identify and share best practices in reducing and/or eliminating the actual fees high school students participating in the Excel in CTE programs are assessed and ensure actual costs and potential subsidies are adequately communicated.
- 5) Partner with Kansas technical colleges to develop and implement targeted objectives that guide the use of the Kansas Technical College Operating Grant Fund (HB 2195) in supporting instructional and operational priorities.
- 6) Collaborate with the Excel in CTE Task Force to develop a system-wide policy for course failures, create consistent placement guidelines for participating high school students, and finalize the review of Excel in CTE programs needing further analysis.
- 7) Diversify and strengthen the Adult Education funding base to expand and sustain services, while advancing collaboration and integration among Community Colleges, Technical Colleges, and Adult Education Centers.

1)	Receive a presentation from SkillsUSA Officers	Vera Brown, Director for Career Technical Education p.28
2)	Receive an update on Ability to Benefit	Eric Tincher, State Director SkillsUSA Kansas p.30
3)	Act on Academic Year 2026-2027 Excel in Career Technical Education (CTE) Fees	Julie Clark, Associate Director for High School Equivalency p.31
4)	Receive an update from the Excel in CTE Taskforce	Charmine Chambers, Director for Workforce Development p.33
5)	Review and Discuss Tiered Course Designation	Charmine Chambers, Director for Workforce Development p.35
		Charmine Chambers, Director for Workforce Development p.37

VI. Next Meeting Reminder*Thursday, February 19, 2026**Virtual***VII. Adjournment**

**KANSAS POSTSECONDARY
TECHNICAL EDUCATION AUTHORITY**
MINUTES
November 20, 2025

The Kansas Postsecondary Technical Education Authority (TEA) meeting was called to order by Chair David Reist at 10:00 a.m. on November 20, 2025. The meeting was held virtually via Zoom.

MEMBERS PRESENT:	David Reist, Chair	Debra Mikulka
	Curtis Sneden, Vice Chair	Mike Beene
	Cindy Hoover	Natalie Clark

Chair Reist announced that the consent agenda and discussion item VA4 would be presented prior to the reports to accommodate members who may need to leave the meeting early.

APPROVAL OF THE MINUTES FROM THE PREVIOUS MEETING

Member Sneden moved to approve the minutes for the October 23, 2025, meeting. Member Beene seconded, and the motion carried.

CONSENT AGENDA

Member Hoover moved to approve the consent agenda. Member Beene seconded, and the motion carried. The following items were approved:

Technical program and curriculum committee

ACT ON A REQUEST FOR DEGREE AND/OR CERTIFICATE PROGRAM: WICHITA STATE UNIVERSITY CAMPUS OF APPLIED SCIENCES AND TECHNOLOGY: AUTOMATION ENGINEER TECHNOLOGY (15.0406)

Wichita State University Campus of Applied Sciences and Technology (WSU Tech) has received approval to offer a 52-credit hour Technical Certificate program and a 61-credit hour Associate of Applied Science in Automotion Engineer Technology.

ACT ON A REQUEST FOR A NEW PROMISE ACT PROGRAM: WICHITA STATE UNIVERSITY CAMPUS OF APPLIED SCIENCES AND TECHNOLOGY: AUTOMATION ENGINEER TECHNOLOGY (15.0406)

The following program was approved to become Promise Act eligible:

- Wichita State University Campus of Applied Sciences and Technology: Automation Engineer Technology (15.0406) falls under the Advanced Manufacturing and Building Trades category specified in legislation. SOC 17-3023 for Electrical and Electronic Engineering Technologists and Technicians and SOC 17-3024 for Electro-Mechanical and Mechatronics Technologists and Technicians were identified as High Wage occupations on the 2025 High Demand Occupations list from the Kansas Department of Labor.

ACT ON A REQUEST FOR EXCEL IN CTE FEES: BUTLER COMMUNITY COLLEGE: EMERGENCY MEDICAL TECHNICIAN (EMT) COURSE

The following changes to Excel in CTE fees were approved:

- Butler Community College: increased fee for background checks for Emergency Medical Technician (EMT) course. Changing from \$50 to \$80 effective for spring 2026 term.

ACT ON ARTICULATED CREDIT WITH THE KANSAS STATE DEPARTMENT OF EDUCATION:

The articulated credit crosswalk between KSDE and KBOR for the following programs was approved:

- Automation Engineer Technology (15.0406)
- Industrial Machine/Maintenance Technology (47.03603)

DISCUSSION AGENDA**Other matters****ACT ON CPL GRANT LETTER OF SUPPORT**

Vera Brown, Director for Career Technical Education, requested approval for a support letter to accompany a grant application to the Council for Adult and Experiential Learning (CAEL). The grant aims to strengthen Kansas' process for evaluating military prior learning credits by providing technical assistance, policy and data guidance, and strategies to scale improvements across institutions. The request includes authorizing Chair Reist to sign the letter on behalf of the TEA and nominating one TEA member to serve on the advisory committee. Member Mikulka volunteered to serve on the advisory committee.

Member Sneden moved to approve the request. Member Mikulka seconded, and the motion carried.

INTRODUCTIONS & REPORTS**REPORT FROM THE VICE PRESIDENT FOR WORKFORCE DEVELOPMENT**

April White, Vice President for Workforce Development, reported visiting several institutions, including Pratt Community College, Seward County Community College, Garden City Community College, Dodge City Community College, Fort Hays Tech | Northwest, Colby Community College, Fort Hays Tech | North Central, and Cloud County Community College. She also attended the Rural Talent Lab in North Carolina, where she participated in discussions on strategies to better serve rural communities in Kansas.

REPORT FROM TEA MEMBERS

Member Beene reported attending the ribbon-cutting ceremony for the Heavy Equipment Operator program at Fort Hays Tech | North Central in Beloit. He commended President Burks and his team for hosting an excellent event and recognized their successful grant application, which funded the purchase of new Caterpillar and John Deere equipment. The program was highlighted as one of the best equipped in a five-state region. Member Beene noted the students' enthusiasm and extended compliments to President Burks and his team for their outstanding work.

REPORT FROM THE COMMUNITY COLLEGES

Amber Knoettgen, President of Cloud County Community College, presented the community college report and highlighted key student-success metrics. She noted that in 2024, community and technical colleges produced 60% of all credentials earned statewide. Institutions are strengthening student outcomes by expanding learning center support, dual advising, early-alert systems, wraparound services, and the use of AI tools, as well as offering incentives to help near-completion students finish their credentials. President Knoettgen also reported that Butler Community College hosted the Kansas Community College Corequisite Symposium in October, where sixteen community colleges collaborated on strategies, and ideas and worked through a guided discussion to enhance English and math co-requisite instruction. She concluded by congratulating Barton Community College, Coffeyville Community College, Colby Community College, and Cowley County Community College for being named Aspen Prize Top 200 institutions.

REPORT FROM THE TECHNICAL COLLEGES

Greg Nichols, President of Salina Technical College, presented the report for the technical colleges and congratulated the institutions named to the Aspen Top 200 list, noting that five of Kansas' seven technical colleges are eligible to apply for the Aspen Institute's \$1 million prize. He emphasized the sector's continued focus on affordability and access to higher education, highlighting strong scholarship support provided through the Flint

Hills Technical College, Wichita State University Campus of Applied Sciences and Technology, and Manhattan Area Technical College foundations. President Nichols noted that strong workforce demand and available resources remain strong, students still face barriers that institutions are working to address. He reported that colleges are actively partnering with industry to expand programming and strengthen the talent pipeline. He concluded by sharing that job placement rates in high-demand, high-wage fields offered by technical colleges remain exceptionally strong at 92–95%.

DISCUSSION AGENDA

Other matters

RECEIVE AN UPDATE ON FY2026 STATE SAFETY FUND

Becky Pottebaum, Director for Finance and Administration, provided an update on the FY 2026 Safety Fund, which supports community colleges offering approved motorcycle safety courses and community and technical colleges offering Commercial Driver's License (CDL) training programs. She explained that funding is allocated based on student enrollment, with CDL enrollment reported directly to KBOR and motorcycle safety enrollment collected by the Department of Education (KSDE). In academic year 2025, nine community colleges enrolled 463 CDL students, an 8.7% increase from 2024—and received a total of \$60,395. For motorcycle safety programs, KSDE set a \$75 per student funding rate for FY 2026. Six colleges trained 1,157 motorcycle safety students in academic year 2025, a 3.8% increase from the prior year, resulting in \$86,775 in total funding. Both distributions were issued to eligible institutions in early November.

RECEIVE AN UPDATE ON THE PERKINS RESERVE GRANT

Jamie Whitmore, Associate Director for Career Technical Education, presented an update on the FY 2025 Perkins Reserve Grant. She explained that the Perkins Reserve comprises roughly 15% of Kansas' federal Perkins V allocation and is distributed competitively to address high-priority statewide needs and support high-skill, high-wage career pathways. For FY 2025, the grant focused on reducing barriers to success for students in Perkins-defined special populations, including economically disadvantaged students, individuals with disabilities, English language learners, and students pursuing nontraditional fields. Institutions analyzed performance gaps within these groups and proposed projects aimed at improving credential attainment, employment outcomes, and overall access. For FY 2025, \$500,000 was distributed to the ten eligible institutions who applied.

RECEIVE AN UPDATE ON THE INSTITUTIONAL PROGRAM ALIGNMENT VERIFICATION PROJECT

Crystal Roberts, Associate Director for Workforce Development, provided an update on the Institutional Program Alignment Verification (IPAV) project, which supports the TEA's statutory responsibility to strengthen technical education through aligned programs that meet industry needs. She explained that the AY 2026 project framework was launched in response to instances of alignment non-compliance and inconsistent procedural interpretations. The project opened in October 2024, followed by a webinar for all eligible institutions, which were required to submit IPAV documentation by March 1, 2025. Workforce development staff conducted an extensive review by June 30, 2025, comparing each institution's KHEDS data, websites, catalogs, degree maps, and other public program information to TEA-approved alignment maps. Staff used the IPAV spreadsheet to track corrections and communicate with institutions, and they identified common issues that led to the creation of a living FAQ document. To accommodate varying institutional timelines, a grace period for achieving full alignment was extended to July 1, 2026, although most compliance issues have already been resolved. All participating institutions submitted presidential certification letters confirming their commitment to alignment. Associate Director Roberts noted that the project allowed for a necessary systemwide recalibration and highlighted that developing an alignment survey for programs governed by third-party accreditors may further streamline future realignments.

NEXT MEETING REMINDER

Chair Reist closed by reminding members that the next TEA meeting will be held virtually on December 18, 2025.

ADJOURNMENT

Chair Reist adjourned the meeting at 10:35 p.m.

WORKFORCE DEVELOPMENT REPORT

January 2026

Adult Education Unit Update

Director Hector Martinez

The Adult Education (Adult Ed) team successfully completed the third and final leadership training session with the Kansas Leadership Center in Wichita, further strengthening leadership capacity across the system.

Fall data review meetings for all WIOA Title II programs have concluded, and spring data reviews are underway. These reviews emphasize effective implementation of the new Adult Ed data management system, LACES, to ensure data accuracy, consistency, and compliance.

In January, Salina USD 305 hosted an open house commemorating 45 years of Adult Ed service to the community. Director Hector Martinez and Associate Director Susanna Lee attended to engage with community stakeholders and view artwork created by individuals impacted by Adult Ed. The artwork remains on display at the Salina Art Center through February 8.

In early February, Adult Ed will distribute data and programmatic updates to institutions administering WIOA Title II programs. College presidents and school superintendents are encouraged to review the information to support institutional awareness and alignment.

Adult Ed continues to collaborate with partners to advance pathways for Internationally Educated Nurses (IENs). Key partners include the Kansas Nursing Association and Dr. Garcia with the Kansas Nursing Workforce Center. Recently, nursing recruiters were surveyed, with responses received from over 40 healthcare facilities statewide. Many hospitals have expressed interest in meeting with Adult Ed to explore education and workforce pathway supports.

Members of the Authority may recall that WIOA Title II federal funding delays at the start of the fiscal year impacted early enrollment levels. As a result, total participation at the end of the second quarter remains lower than the same period last year. However, month-by-month FY 2026 performance consistently meeting or exceeding prior-year levels, demonstrating strong learner outcomes. Participants continue to make measurable gains, including advancing an educational functioning level (equivalent to approximately two grade levels), earning high school equivalency diplomas, enrolling in postsecondary education, and obtaining industry-recognized credentials.

Career Technical Education Unit Update

Director Vera Brown

In collaboration with the Kansas State Department of Education (KSDE) CTE staff, the Board's Career Technical Education (CTE) team continues to provide technical assistance for the Comprehensive Local Needs Assessment (CLNA). Regional teams across the state, consisting of a Secondary and Postsecondary co-chair along with various groups of stakeholders, assessed labor market data provided by Kansas Dept of Labor to

determine program needs in their region. Training was also provided on the narrative questions in the CLNA, and how each region should address any particular areas of concern. The final CLNA training was held January 12, allowing time for draft CLNAs to be reviewed by Board Staff prior to the submission deadline of February 2, 2026.

The CTE team attended the webinar *Building the Workforce for the Golden Age: A Conversation with Federal Leaders*, to gain insights on the administration's plan to develop the nation's workforce to meet the demands of a rapidly changing economy. Leaders from the Federal Department of Labor and Department of Education presented priorities such as an industry-driven approach to learning, integrating workforce programs, and aligning state plans like WIOA and Perkins V. Future webinars are expected to follow up on these topics.

Work began on the fiscal year 2025 Consolidated Annual Report (CAR) for Perkins. The CTE team holds regular meetings with KSDE staff to report on Perkins spending for Secondary and Postsecondary CTE programs and pathways. Data teams from both organizations have been invaluable in providing detailed reporting for this process. The CAR is submitted to the U.S. Department of Education, specifically, the Office of Career, Technical, and Adult Education by January 31, 2026.

The CTE unit has selected the two institutions who will receive onsite visits for the Methods of Administration compliance review. This is a requirement of the Office of Civil Rights to ensure compliance among institutions offering federally funded CTE programs. Technical assistance was provided to the selected institutions to manage expectations and allow time to provide the necessary documentation. The campus visits are expected to take place in February.

Board staff are also preparing for FY25 program and fiscal reviews. Institutions will be provided technical assistance with the review process. These reviews are expected to take place in April 2026, including a desk audit and campus visits.

Workforce Development Unit Update

Director Charmine Chambers

The Workforce Development (WFD) team collaborated closely with the Data, Research, and Planning team during November and December to review Academic Year 2025 funding calculations. Institutions completed final updates to the Excel in CTE fee data, including an additional review of program fee totals due in early December. The Excel in CTE Task Force convened in December to finalize its recommendations.

The WFD team also prepared materials for the legislative session, including the Kansas Training Information Program (K-TIP) report, the University Engineering Scorecard, and updates to the Excel in CTE website. Ongoing review of the Course Buckets has identified a need to examine Tiered courses for statutory alignment, and a recommendation to conduct this review has been developed for consideration by the Authority.

KANSAS ASSOCIATION OF COMMUNITY COLLEGES

Our Mission: To build a strong Kansas workforce through support, collaboration, and communication to advocate on behalf of Kansas community colleges to better serve students, businesses, and communities.

In 2020, the Kansas Board of Regents adopted the strategic plan, *Building a Future*, which recognizes the unique capabilities of colleges and universities to create prosperity for Kansas. It centers the work of our system on serving Kansas families, supporting Kansas' businesses and growing the economy. These three pillars contain areas of focus that help direct the system's efforts:

- Families: Affordability, Access and Success
- Businesses: Talent Pipeline and Innovation
- Prosperity: Intentional Economic Development and Community Benefits

Building a Future includes a set of metrics to track progress through a [dashboard](#). The community college report this month highlights growing the talent pipeline, which is a key area of focus within the Business pillar.

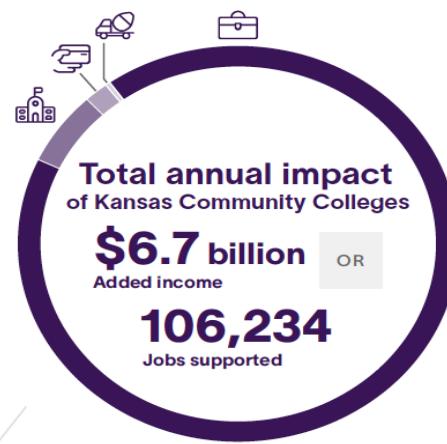

Talent Pipeline

Kansas public postsecondary institutions are working with business and industry to meet the talent needs of employers today and in the future.

Community Colleges Economic Impact Analysis – *Lightcast FY21-22*

In FY 2021-22, Kansas community colleges added **\$6.7 billion** in income to the state of Kansas economy, a value approximately equal to **3.3%** of the state's total gross state product (GSP). Expressed in terms of jobs, the Kansas community colleges' impact supported **106,234 jobs**. For perspective, the activities of the community colleges and their students support **one out of every 18 jobs** in Kansas.

An example of the Kansas community colleges' impact by industry is that 28,028 jobs in the Health Care & Social Assistance industry were supported by community colleges in FY21-22.

Growing the Talent Pipeline

Allen Community College: The Kansas Promise Scholarship is the path of second chances for the Kansas early childhood workforce. As one of the state's largest Early Childhood Education (ECE) career and technical education programs, Allen has supported 41 ECE majors through the Promise Scholarship – 87% reinstating their financial aid eligibility and 13% bridging gaps between eligibility and the true cost of higher education. This support enables students to become more skilled childcare providers and improves the quality of care for young children across Kansas. Out of 37 recipients since May 2021, fewer than 10% have not completed their program. By utilizing this scholarship as one of the vital tools for access, we have developed partnerships with Head Starts, school districts, and childcare programs across the state assisting their staff to access higher education.

Barton Community College: After graduating from Barton's Construction Tech program in just one semester, Great Bend native Brecken Carroll immediately found employment and started earning a living as part of the window installation crew at MPIRE Improvements of Great Bend.

Butler Community College: Butler student John Mundell is thriving in the college's Fire Science program thanks to the Kansas Promise Scholarship, which opened a clear path for him from high school to college. After discovering the program on the approved Kansas Promise list, he applied on his own with ease. "Fire Science has always been a passion for me. It was perfect." Mundell credits the scholarship as well as supportive faculty and a seamless admissions and financial aid process for keeping him on a successful track at Butler.

Cloud County Community College: Since the enactment of the Kansas Promise Act Scholarship program, CCCC has awarded nearly \$300,000 in total funds. Furthermore, 70% of Cloud alumni continue to live and work within the college's 12-county service area after graduation, demonstrating strong talent growth and retention in Kansas.

Coffeyville Community College: Coffeyville CC recently started two new Promise Act programs this fall at the request of local industry leaders; HVAC and Plumbing. Both are part-time programs with 21 students attending. The programs are designed with a program internship course, placing students with local industry partners with an opportunity for employment upon completion. These two programs will help fill local and area demand for HVAC and Plumbing technicians in southeast Kansas. CCC offers 19 Promise Act eligible programs for Kansas students, with Medical Assisting, Nursing, Electrical/Electrician, Fire Science, and Welding programs being the most popular for Promise Act eligible students.

Cowley College: Cowley College has seen steady use of the Kansas Promise Scholarship with 134 students receive \$396,664 in dollars during AY 2024-25. This scholarship opportunity has contributed to a noted increase in students seeking degrees in high demand allied health fields of Medical Coding and Emergency Medical Services. The Kansas Promise Scholarship has been instrumental in providing dollars to support students in programs that are strongly needed, both locally and within the state.

Fort Scott Community College: Fort Scott has implemented Construction Technology classes on their campus in collaboration with Fort Scott High School and seen an increase in enrollment. The college has also seen an increase from 50 to 60 students in Agriculture as compared to last year.

Highland Community College: Across Fall 2024, Spring 2025, and Fall 2025, the Kansas Promise Scholarship has supported 40 nursing students at Highland Community College with an investment of around \$159,000. This support is more than financial – it represents opportunity. At a time when our healthcare

workforce is in urgent need, these students are preparing to serve communities across Kansas. Without this last-dollar scholarship from the State of Kansas, many may not have had this chance – and the workforce gap would only have grown wider.

Hutchinson Community College: In response to industry request in McPherson County, HutchCC has added a classroom and lab in McPherson to teach entry level Automation Engineering Technology classes. Industry in McPherson County has a significant need for employees in this space and asked if HutchCC could replicate a program that was added in Newton last year. Students in these programs in Newton and McPherson can obtain their Certificate A in Industrial Mechanical Maintenance in one year. All the students in these programs either come in as apprentices or have the opportunity to apply to become apprentices.

Independence Community College: Independence Community College (ICC) is committed to strengthening Kansas' healthcare workforce by providing accessible, high-quality technical education aligned with regional and state workforce needs. The Emergency Medical Technician (EMT) program is a critical component of this mission, preparing students to enter high-demand emergency medical services roles across Southeast Kansas and beyond. The Kansas Promise Scholarship has played a vital role in supporting EMT student access, persistence, and completion, particularly for students who may not otherwise have the financial means to pursue training in this essential field. The Kansas Promise Scholarship strengthens this pipeline by ensuring students can complete training without incurring significant debt, increasing the likelihood they remain in the profession and in the state.

Johnson County Community College: JCCC's Workforce Development & Continuing Education (WDCE) branch advanced these goals in FY25 by collaborating with more than 60 employers and industry partners. Together, they designed customized training solutions that addressed workforce gaps and fueled economic growth. Over 5,269 employees from area companies participated in contract training tailored to their needs, delivered both on campus and at their workplaces.

Labette Community College: Labette has had 22 students utilize Promise Act funding to help pay the costs of program materials and support. Of the 22 students, 19 enrolled in health science programs: Diagnostic Medical Sonography, Nursing, Radiography, and Respiratory Care. There are nine students who have graduated and are now working in their intended fields.

Neosho County Community College: The Kansas Promise Act is fully utilized by Neosho and its students to help advance workforce needs of the state. In 2025 Fall semester, which just concluded, 103 NCCC students received a combined \$207,103.98 in Kansas Promise Act funds. Those 103 students were in 17 different high-need/high-wage programs including Diagnostic Medical Sonography, Welding, Plumbing, Surgical Technology, Occupational Therapy Assistant, and Electrical. The program with the largest number of Promise Act recipients at our college is Nursing. Of the 103 fall students in the Promise Act at NCCC, over half (55) are training to be a nurse, one of the most needed occupational areas in Kansas. At the December 2025 Commencement and Pinning ceremony, 57% of the nurses that crossed the stage and received their degree or certificate were Promise Act recipients.

Pratt Community College: Pratt Community College has seen an increase in enrollment in our Electrical Power Technology (EPT) Program since the inception of the Kansas Promise Act. The initial year of this last dollar in scholarship PCC had a total of 31 students take advantage of the scholarship and this number grew to 54 and 49 over the next two years. Over 80% of these students are participating in the EPT Program. This program produces close to 100 completers annually through the Pratt campus and our partnerships with Coffeyville Community College, Wichita State University Tech and Dodge City Community College. The vast majority of these students remain in Kansas following program completion and earn high starting salaries.

Seward County Community College: A steady and consistent increase in Kansas Promise students at Seward County Community College has enabled the college to supply nursing and respiratory care personnel to our local rural health care centers. While students have also accessed Kansas Promise funds for computer information and education study, the vast majority of scholarship recipients are focused on health care.

Since 2022, 44 nursing students have graduated from SCCC utilizing Kansas Promise Funding; 10 respiratory care professionals; 7 surgical technicians; and 2 medical lab technicians. These Saints graduates are a stabilizing force for healthcare providers and patients in the Southwest quadrant of Kansas, providing great health care close to home.

Recent News Among Community Colleges:

All Colleges

- Emporia State University signed an agreement with the 19 community colleges from the Kansas Association of Community Colleges to facilitate a smoother transition for students transferring from community colleges to ESU. [Emporia Gazette](#)
- During a recent gathering of Kansas Community College presidents held at Garden City Community College, Fort Hays State University introduced a new scholarship program designed to provide funds to Kansas Community College presidents to distribute directly to students who plan to attend FHSU, but need additional financial aid to successfully transition to a four-year degree program. [Hays Post](#)

Colby Community College, Dodge City Community College, Garden City Community College, & Seward County Community College

Seward, Colby, Dodge, and Garden signed a Memorandum of Agreement in December. The Western Kansas Consortium MOA strengthens partnerships among the four colleges and creates new opportunities to expand educational access, support workforce development, and maximize resources for students and communities across Western Kansas and the state. Kansas Technical Colleges are committed to supporting the Kansas Board of Regents in Building a Future for Kansas. Each Technical College supports KBOR's strategic goals. Here is how the Technical Colleges put these strategic goals in action in November and December.

Flint Hills Technical College

Helping Kansas Families

Access - The College purchased a facility to house and deliver its Precision Agriculture program and its CDL training program. The location is near the College's welding facility, aligning the common and shared outcomes of the programs while allowing students to easily toggle among the three programs.

Success - The Dental Hygiene Program received grant funding from the Patterson Foundation to purchase a mobile dental unit to allow the College to deliver dental healthcare to rural communities and school districts in Kansas.

Manhattan Area Technical College

Helping Kansas Families

Affordability - Approximately 45% of MATC students are eligible for federal financial aid through Pell Grants. While many are also eligible for student loans, the College has used the Kansas Promise Act and a wide range of other scholarship opportunities to reduce student loan debt. In fact, the average debt of one of our students at graduation is under \$10,000. We continue to work with local donors to provide similar opportunities for adult education students and for persons seeking professional credit (non-academic credit) for credentialed skills.

Access - Through a grant from the Patterson Family Foundation, MATC is reaching out to surrounding rural counties with expanded access using virtual reality experience with persons from middle school and up. This project includes steady integration of VR applications for basic tech and specialized technology training connected to our tech programs of study. These applications increase access and safety, and they reduce our overall costs.

Success - According to the KBOR KTIP report for AY 2024, 141 MATC graduates remained in the state in employment related to their program of study. During their first year of employment, they had collective earnings of more than \$6 million! Average annual wages increased by \$5,000 for MATC graduates from AY 23 to AY 24.

Talent Pipeline - From fall 2024 through all of 2025, MATC worked directly with almost a dozen businesses to provide credit and non-credit courses and opportunities for industry-recognized credentials enhancing productivity for businesses ranging from MANKO to Florence Manufacturing, and more. In addition, the College, working with local partners including the Greater Manhattan Community Foundation and USD 383, have been able to provide early childhood education/childcare courses to more than 30 high school students who can immediately benefit from the new Flint Hills Community Accelerator/Childcare Business Incubator project. This project has increased local childcare by over 50 seats since August 2025.

Advancing Economic Prosperity

Intentional Economic Activity / Community and State Benefits - Working with the Greater Manhattan Economic Partnership, MATC has had a direct hand in keeping and increasing local manufacturing and production jobs by 450 positions since the summer of 2024.

Fort Hays Tech Northwest

Helping Kansas Families

Affordability - Grant funding continues to fund our Medical Assistant training, providing free education to those going into the field. We are also seeing an increasing number of business partners offering sponsorships to students who agree to work for them post completion.

Access - FH Tech | Northwest has expanded CDL training opportunities throughout our service area. This has resulted in rapid growth of program numbers and an increased input into the talent pipeline across Northwest Kansas. Our Gove County welding lab in Quinter continues to provide regional outreach to surrounding school districts for welding training, creating expanded access to welding skills.

Success - Being named in the top 200 in the country for the Aspen Prize, Fort Hays Tech | Northwest continues to produce solid numbers not only recognized at the state level, but at the national level as well.

Supporting Kansas Businesses

Talent Pipeline - The Electrical program at Fort Hays Tech | Northwest continues to produce numbers beyond capacity. This year, we added an instructor, and preliminary numbers indicate further growth next year. The CDL continues to be a popular choice for students looking to enhance their career opportunities.

Other news

FH Tech | Northwest's childcare facility is nearing completion and will soon be offering affordable childcare to employees, students, and community members.

Salina Area Technical College

Helping Kansas Families

Affordability - SATC has the highest graduation rate among public colleges or university in Kansas, according to US Department of Education College Scoreboard.

Access - According to KTIP 2025, 88.2% of Salina Tech graduates earn at least \$15 per hour which is 230% of poverty rate in Kansas.

Success - According to KTIP 2025, 88.2% of Salina Tech graduates earn at least \$15 per hour which is 230% of poverty rate in Kansas.

Supporting Kansas Businesses

Talent Pipeline - Over 92% of Excel in CTE students earn passing grades at SATC, according to KBOR AY collection and funding table for AY23 and AY24.

Advancing Economic Prosperity

Intentional Economic Activity - Salina Tech Nursing received KSBN approval and is awaiting final ACEN accreditation after a recent initial accreditation visit.

Washburn Institution of Technology

Helping Kansas Families

Access - Washburn Tech met with our high school partners from across northeast Kansas to discuss

future plans, answer questions, and get feedback on the best way to serve their students.

Supporting Kansas Businesses

Talent Pipeline - Washburn Tech entertained the COABE Executive Director as part of discussions regarding the best way to move forward with adult education.

Other news

Washburn Tech held a Scouting merit badge day with dozens of scouts from four states attending.

Wichita State University Campus of Applied Sciences and Technology

Helping Kansas Families

Affordability - Celebrated at our Foundation Scholarship Lunch with over 250 students who received funding from our generous donors.

Access – WSU Tech exceeded over 3500 high school student enrollments in our Jump Start and Excel in CTE programs. Between AY13 - AY25, 97.5% of the course enrollments resulted in course completions (students did not receive a failing grade or withdraw).

Other News: All Tech Colleges

Kansas Technical Colleges produce a high percentage of in-state workers: 86.7%, according to KTIP 2025. Five of the seven colleges produce greater than 90% job placement in Kansas. Over 59% of students who declare a major in Kansas Technical Colleges graduate. More than 71% of concentrators graduate in their chosen field.

IV. A. 1. Act on New Career Technical Education Programs Charmine Chambers, Director, Workforce Development

Summary

To develop and enhance the talent pipeline for Kansas business and industry, new programs and/or additional programs are required. The Board office received proposals from the Wichita State University Campus of Applied Sciences and Technology.

The proposing institution has responded to all criteria requested and no comments were received during the Board policy-required 10-day comment period from December 12, 2025, to January 30, 2025. The programs were reviewed and discussed by the Technical Education Authority's Program and Curriculum Committee and are recommended for approval.

Background

Community and technical colleges submit requests for new certificates and degree programs utilizing forms approved by Board staff. Criteria addressed during the application process include but are not limited to the following: program description, demand for the program, duplication of existing programs, faculty requirements, costs and funding, and program approval at the institution level.

Descriptions of Proposed Programs:

Institution: Wichita State University Campus of Applied Sciences and Technology (WSU Tech)

I. General Information and Program Identification

Program Title	Heavy Equipment Operation
Degree Level(s) and Credit Hours	Technical Certificate B/35 credit hours, and Associate of Applied Science/60 credit hours
Responsible Department or Unit	Jessi Lane, Dean, Applied Technologies
CIP Code	49.0202 Construction / Heavy Equipment / Earthmoving Equipment Operation
SOC Code	47-2073 Operating Engineers and other Construction Equipment Operators
Industry-Recognized Certifications	OSHA10, NCCER Core
Clinical Sites/Work-Based Learning	Internship course offered as elective
Number of Projected Enrollments	Year 1: 10 Year 2: 10 Year 3: 10
Accrediting Body Approval Status	NA
Aligned Program Status	NA
Proposed Implementation	Fall 2026

II. Program Rationale and Information

Wichita State University Campus of Applied Sciences and Technology (WSU Tech) explained that the institution received the request for the new program from the Southeast Kansas Career and Technical Education Center (SEK CTEC) due to the conclusion of their partnership with Fort Scott Community College at the end of the 2025 Academic Year. Due to the timing of this transition, WSU Tech received approval to adjust existing curriculum to support the SEK CTEC while the college began the process to develop and make the formal proposal for the Heavy Equipment Operation program.

A degree map was provided in the application, and this program consists of a single pathway or track. Letters of support were included from SEK CTEC USD's, including Northeast USD 246, Girard USD 248, Frontenac USD 249, and Pittsburg USD 250 as the program will be offered to high school students.

III. Program Demand – Note: High Demand/High Wage occupation, 2025 Kansas DOL listing.

A. Source: Kansas Department of Labor Long-term Occupation Projections 2022-2032 for 47-2073

Occupational Demand Ranking	71 of 796
Annual change in employment:	.4%
Annual median wage:	\$50,600
Annual openings:	603
Typical education for occupation entry:	High school diploma or equivalent and moderate-term on-the-job training

B. Source: Lightcast Job Postings: November 2024 – November 2025 for the state of Kansas

Total postings:	461 Total, (198 unique)
Annual median advertised salary:	\$45,600

Removing job postings with no education level listed, 98% of postings indicate a high school diploma or GED as the minimum education for entry in the occupation. (Including job postings with no education level listed, 1,662 total postings (638 unique) were reported, with an advertised salary of \$48,600, and 69% of the job postings listed no education level requirement for entry.)

WSU Tech explained that Heavy Equipment Operation: Page 15, Question 2 of the Comprehensive Local Needs Assessment (CLNA) directly identifies the related occupations—Paving, Surfacing, and Tamping Equipment Operators and Operating Engineers and Other Construction Equipment Operators—as pathways not currently offered but needed in the region based on occupational demand.

Three letters of support for the proposed program were received from Crossland Construction Company, Next Generation Enterprise LLC, Unique Metal Fabrication LLC. Supports and commitments for the program include interviewing graduates for available positions, equipment donations, internships, and serving on the advisory committee.

IV. Duplication of Existing Programs and Collaboration

Currently two institutions offer this program based on CIP code and/or program title. Below are the colleges, programs, total number of concentrators, total number of graduates, total number of graduates exiting the higher education system and employed, and average wage of graduates who exited the higher education system and are employed information from the 2024 K-TIP report, which includes only technical programs in two-year postsecondary institutions.

Kansas Training Information Program						
2024 K-TIP Construction/Heavy Equipment/Earthmoving Equipment Operation 49.0202						
CIP Code	Program Name	Institution	Total # Concentrators	Total # Graduates	Total # Graduates Exited & Employed	Average Wage: Graduates Exited & Employed
49.0202	Heavy Equipment Operation	Fort Hays Tech North Central	23	20	16	\$41,967
49.0202	Heavy Equipment Operations	For Scott Community College (new program, 8/2024)	NA	NA	NA	NA
Total			23	20	16	\$41,967

(^) small cell protection applied.

WSU Tech explained that collaboration with Fort Scott Community College occurred throughout the transition process to ensure a seamless experience for students and program integrity.

V. Cost and Funding for Proposed Program

The college estimates the initial cost of the proposed program at \$41,000 total. Funding sources include the program budget.

Instructional Supplies/Technology:	\$1,000
Faculty:	\$40,000 for one half of an existing, full-time faculty member (program shares instructional personnel with the Masonry program)

Institution: Wichita State University Campus of Applied Sciences and Technology (WSU Tech)

I. General Information and Program Identification

Program Title	Masonry Construction
Degree Level(s) and Credit Hours	Technical Certificate B/38 credit hours, and Associate of Applied Science/60 credit hours
Responsible Department or Unit	Jessi Lane, Dean, Applied Technologies
CIP Code	46.0101 Mason/Masonry
SOC Code	47-2021 Brick Masons and Block Masons
Industry-Recognized Certifications	NCCER Masonry – Level 1 - 3
Clinical Sites/Work-Based Learning	NA
Number of Projected Enrollments	Year 1: 10 Year 2: 10 Year 3: 10
Accrediting Body Approval Status	NA
Aligned Program Status	NA
Proposed Implementation	Fall 2026

II. Program Rationale and Information

Wichita State University Campus of Applied Sciences and Technology (WSU Tech) explained that, similar to the Heavy Equipment Operation program, the institution received the request for the new program from the Southeast Kansas Career and Technical Education Center (SEK CTEC) due to the conclusion of their partnership with Fort Scott Community College at the end of the 2025 Academic Year. Due to the timing of this transition, WSU Tech received approval to adjust existing curriculum to support the SEK CTEC while the college began the process to develop and make the formal proposal for the Masonry Construction program

A degree map was provided in the application, and this program consists of a single pathway or track. Letters of support were included from SEK CTEC USD's, including Northeast USD 246, Girard USD 248, Frontenac USD 249, and Pittsburg USD 250 as the program will be offered to high school students.

III. Program Demand – Note: High Wage occupation, 2025 Kansas DOL listing.

A. Source: Kansas Department of Labor Long-term Occupation Projections 2022-2032 for 47-2021	
Occupational Demand Ranking	373 of 796
Annual change in employment:	.3%
Annual median wage:	\$54,770
Annual openings:	54
Typical education for occupation entry:	High school diploma or equivalent and apprenticeship
B. Source: Lightcast Job Postings: November 2024 – November 2025 for the state of Kansas	

Total postings: 6 Total, (4 unique)
 Annual median advertised salary: Insufficient data
 Removing job postings with no education level listed, 100% of postings indicate a high school diploma or GED as the minimum education for entry in the occupation. (Including job postings with no education level listed, 71 total postings (38 unique) were reported, with an advertised salary of \$62,200, and 89% of the job postings listed no education level requirement for entry.)

WSU Tech explained that while not specifically identified in the most recent Perkins Comprehensive Local Needs Assessment (CLNA) report; Masonry Construction falls under the broader occupational category of Construction Trades and the most recent CLNA report (page 13) lists Construction among the pathways and programs with too few concentrators relative to the number of available job openings.

Four letters of support for the proposed program were received from Cleland Masonry, Crossland Construction Company, Next Generation Enterprise LLC, Unique Metal Fabrication LLC. Supports and commitments for the program include interviewing graduates for available positions, equipment donations, apprenticeships, and serving on the advisory committee.

IV. Duplication of Existing Programs and Collaboration

Currently one institution offers this program based on CIP code and/or program title. Below are the colleges, programs, total number of concentrators, total number of graduates, total number of graduates exiting the higher education system and employed, and average wage of graduates who exited the higher education system and are employed information from the 2024 K-TIP report, which includes only technical programs in two-year postsecondary institutions.

Kansas Training Information Program						
2024 K-TIP Mason/Masonry 46.0101						
CIP Code	Program Name	Institution	Total # Concentrators	Total # Graduates	Total # Graduates Exited & Employed	Average Wage: Graduates Exited & Employed
46.0101	Masonry Certificate Program	Fort Scott Community College	9	^	^	^
Total			9	^	^	^

(^) small cell protection applied.

WSU Tech explained that collaboration with Fort Scott Community College occurred throughout the transition process to ensure a seamless experience for students and program integrity. Additionally, all faculty previously employed by Fort Scott in this program were hired at the time WSU Tech assumed responsibility for the program.

V. Cost and Funding for Proposed Program

The college estimates the initial cost of the proposed program at \$41,000 total. Funding sources include the program budget.

Instructional Supplies/Technology: \$1,000
 Faculty: \$40,000 for one half of an existing, full-time faculty member (program shares instructional personnel with the Heavy Equipment Operation program)

IV. A. 2. Act on Request(s) for New Promise Act Program(s)

Charmine Chambers, Director for Workforce Development

Summary

The Kansas Legislature enacted the Kansas Promise Scholarship Act, which provides scholarships for students to attend an eligible postsecondary education institution. Eligible programs include any two-year associate degree program, career and technical education certificate, or stand-alone program that are approved by the Board of Regents and correspond to high wage, high demand, or critical need occupations in:

- *four specified fields of study (information technology and security; mental and physical healthcare; advanced manufacturing and building trades; and early childhood education and development).*
- *one college designated field of study from the specified list (Agriculture; Food and Natural Resources; Education and Training; Law, Public Safety, Corrections, and Security; or Distribution and Logistics).*
- *transfer programs with established 2+2 and/or articulation agreements.*

Background

On May 23, 2022, Governor Kelly signed 2022 Senate Substitute for House Bill 2567, which adopted changes in the Kansas Promise Scholarship Act, K.S.A. 2022 Supp. 74-32,271 et seq. The Act also maintains that the Board of Regents will administer the program. Administration is broken into three categories: rules and regulations, eligible programs, and other responsibilities.

Per statutory language (K.S.A. 2022 Supp. 74-32,271(b)(4) and K.S.A. 2022 Supp. 74-32,272(c)(1)(B)), a “promise eligible program” means any two-year associate degree program or career and technical education certificate or stand-alone program offered by an eligible postsecondary educational institution that is:

- a) approved by the Board of Regents;
- b) high wage, high demand, or critical need; and
- c) identified as a “promise eligible program” by the Board of Regents pursuant to K.S.A. 2022 Supp. 74-32,272, within any of the following fields of study:
 - Information Technology and Security
 - Mental and Physical Healthcare
 - Advanced Manufacturing and Building Trades
 - Early Childhood Education and Development

K.S.A. 2022 Supp. 74-32,272(a) states an eligible postsecondary educational institution may designate an additional field of study to meet local employment needs if the promise eligible programs within this field are two-year associate degree programs or career and technical education certificate and stand-alone programs approved by the Board of Regents that correspond to jobs that are high wage, high demand, or critical need in the community from one of the following fields:

- Agriculture;
- Food and Natural Resources;
- Education and Training;
- Law, Public Safety, Corrections, and Security; or
- Distribution, Logistics, and Transportation

K.S.A. 2022 Supp. 74-32,272(d) states that the Board of Regents may designate an associate degree transfer program as an eligible program only if such program is included in:

- a) An established 2+2 agreement with a Kansas four-year postsecondary education institution; or
- b) An articulation agreement with a Kansas four-year postsecondary educational institution and is part of an established degree pathway that allows a student to transfer at least sixty credit hours from the

eligible from the eligible postsecondary educational institution to a four-year postsecondary education institution for the completion of an additional sixty credit hours toward a bachelor's degree.

Recommendation

The following programs are seeking approval to become Promise Act eligible programs. The programs have been reviewed by the Technical Education Authority' Program and Curriculum Committee and are recommended for approval:

- Wichita State University Campus of Applied Sciences and Technology: Heavy Equipment Operation (49.0202) falls under the Advanced Manufacturing and Building Trades category specified in legislation. SOC 47-2073 for Operating Engineers and other Construction Equipment Operators was identified as a High Demand/High Wage occupation on the 2025 High Demand Occupations list from the Kansas Department of Labor.
- Wichita State University Campus of Applied Sciences and Technology: Masonry Construction (46.0101) falls under the Advanced Manufacturing and Building Trades category specified in legislation. SOC 47-2021 for Brick Masons and Block Masons was identified as a High Wage occupation on the 2025 High Demand Occupations list from the Kansas Department of Labor.

V. A. 1. Budget and Finance Committee**Receive Information on Instructional Cost Model Calculations for Delivery of Tiered and Non-Tiered Courses (Formerly Referred to as the “GAP Report”)**

Elaine Frisbie, Vice President for Finance and Administration

Summary

2011 Senate Bill 143 (KSA 71-1801, et seq.) created a formula for distributing state aid for postsecondary technical education courses, which was to take effect in FY 2012. The instructional cost model aggregates institutions' costs to deliver courses and recognizes the cost differentials in delivering a variety of technical courses and non-technical courses. The course rates are updated annually using credit hour enrollments and institutions' reported cost data.

The instructional cost model output for the most recent year, reflecting the instructional cost model calculations generated by following the standard practice and using the same data sources as has been followed since inception of the instructional cost model. Staff will present on the instructional cost model and the calculations for FY 2027.

KSA 71-1801, et seq. provides for a postsecondary education cost model for distribution of technical education state appropriations to the community and technical colleges. The formula was later determined to be applicable to distribute state aid for general education credit hours as well.

Forged out of collaboration between representatives of the community and technical colleges with the Board of Regents, the approach for determining state funding under this legislation is the instructional cost model, which calculates a course-level cost rate and recognizes the cost differential in delivering technical courses. Each course is designated “tiered” or “non-tiered.” For a course to be identified as “tiered,” a course must be both a technical course and part of an approved technical program. All other courses are designated non-tiered. Similar courses are grouped together for consistency across the system and to reflect varying cost differentials for the groups of courses. Components of the instructional cost model are updated annually.

Legislative appropriation provisos limited widespread application of the instructional cost model to colleges’ state grants for tiered and non-tiered courses until FY 2023. From FY 2012 through FY 2022, the tiered and non-tiered course credit hour aid was not dependent on the instructional cost model calculations. The “gap” report was essentially a hypothetical exercise, rather than a determinant for the colleges’ state aid for tiered and non-tiered courses as in those years, as state aid failed to cover the state’s total calculated share of the instructional cost model – i.e., there was a “gap” in state aid for each year. Provisos attached to the appropriations varied, but they generally prevented full application of the instructional cost model to colleges’ state aid with the intent of holding the colleges’ aid at a consistent level from year to year, rather than adjusting state aid to enrollments – particularly when there were overall shortfalls in state aid.

The 2022 Legislature appropriated state funds that eliminated the calculated state gaps in the instructional cost model and enacted a proviso to begin a three-year process to recenter the state aid:

FY 2023	Colleges with no gap were held at FY 2022 state aid level
FY 2024	Colleges with no gap retain 50% of overfunding
FY 2025/beyond	State aid is distributed according to the instructional cost model calculations

There has been no gap in state aid from FY 2023 through FY 2026. The instructional cost model calculations for the state’s share of courses delivered in FY 2025 are attached. For FY 2027, **\$5,277,641** for tiered state aid and **\$3,611,342** for non-tiered course credit hour grants would be needed to avoid creating a gap in state funding next year. Governor Kelly has recommended slightly less than one-half of this adjustment in her budget recommendations to the 2026 Legislature (\$2,582,052 for tiered courses and \$1,766,826 for non-tiered courses);

the Special Committee on the State Budget did not recommend any enhanced funding for FY 2027 for any agency as the Legislature's starting point for the budget process. The House and Senate committees will take up the matter in coming weeks, and the Board of Regents will provide the information presented to advocate for the additional \$8.9 million.

Cost Calculations

Tiered (Technical Courses)

Total Course Rate = Instructor Costs + Extraordinary Costs +
Instructional Support Costs + Institutional Support Costs

Non-Tiered (General Education Courses)

Total Course Rate = Instructor Costs +
Instructional Support Costs + Institutional Support Costs

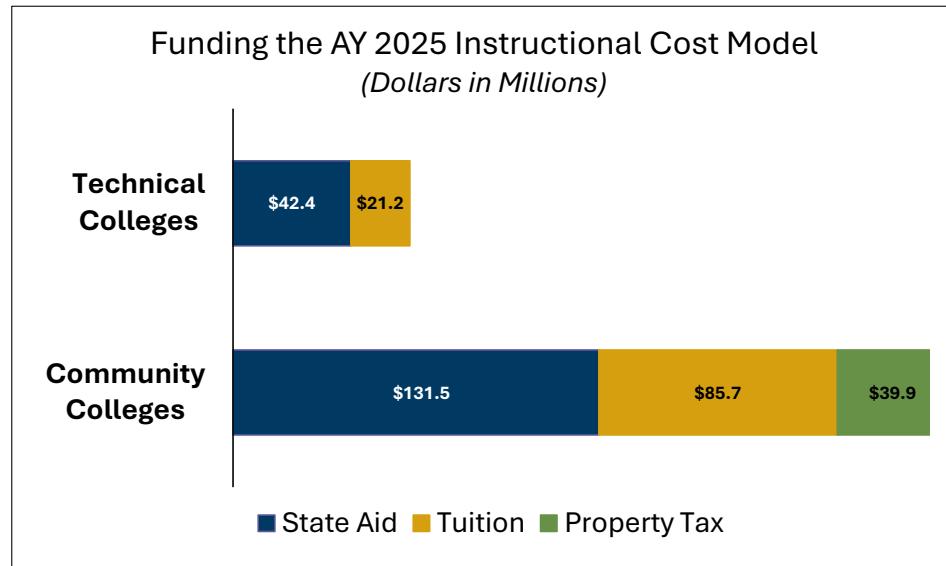

There are 25 cost model composite rates ranging from \$241 to \$589 per credit hour for AY 2025 enrollments.

Financing of Costs

Total Course Cost = Course Rate X Eligible Student Credit Hours (SCH)

The "state's share"¹ of the total calculated cost is based on student credit hours reported by the colleges:

- Community College in-district SCH² = 1/3 student, 1/3 local taxing district, 1/3 state
- Community College out-district SCH = 1/3 student, 2/3 state
- All Technical College SCH = 1/3 student, 2/3 state
- Secondary students in Excel in CTE = 100% state

1 The calculated share of the student, local community and the state under the instructional cost model are based on several assumptions, including "full funding" of the state's share calculated in the model by the Legislature.

2 An in-district community college student resides within the college's taxing district (which is the local county, except for Montgomery County which has two community colleges so that county is divided roughly in half).

Postsecondary Tiered Technical State Aid

Total	\$88,690,169	\$89,759,752	\$97,468,715	\$91,972,880	\$88,361,538	\$3,611,342

[^] In accordance with 2022 House Substitute for Substitute for Senate Bill 267 Section 109(f) and the recommendations of the 2022 Legislative Committee on Community & Technical College State Funding, FY2027 allocations are calculated based on an average of the three most recent years (AY2023, 2024 and 2025), with full adoption of the cost model calculations.

**V. A. 2. Budget and Finance Committee
Review and Discuss House Bill 2195**

**Vera Brown, Director for Career
Technical Education**

Summary

The 2025 Legislature passed House Bill 2195, providing a statutory basis for technical college operating grants. The TEA Goal #5 is to partner with Kansas technical colleges to develop and implement targeted objectives that guide the use of the Kansas Technical College Operating Grant Fund established in HB 2195 to support instructional and operational priorities.

Background:

The legislation enacted by the 2025 Legislature provides as follows:

Section 1.

- (a) There is hereby established in the state treasury the Kansas technical college operating grant fund, which shall be administered by the state board of regents. All expenditures from the Kansas technical college operating grant fund shall be for instruction and operations to meet target objectives established by the postsecondary technical education authority for each technical college's region and the entire state. All expenditures from the Kansas technical college operating grant fund shall be made in accordance with appropriation acts upon warrants of the director of accounts and reports issued pursuant to vouchers approved by the executive officer of the state board of regents or the executive officer's designee.
- (b) As used in this section, "technical college" means the same as defined in K.S.A. 71-1802, and amendments thereto, and the Washburn institute of technology.

Expenditure Categories:

The Statute does not include a definition of "instruction" or "operations." The TEA may consider adopting a definition to assist technical colleges in categorizing their expenditures. The following draft definitions were developed based on the colleges' single audit categories, instructional model components, collaboration with the Board Finance staff, and conversations with technical college leadership. The purpose of the definition is to provide a framework for technical colleges to identify whether the cost is instructional or operational.

Instruction:

Instructional costs are exclusively related to expenses that directly support the core mission of teaching. This includes faculty salaries and benefits for both credit and non-credit courses, departmental expenses for academic programs such as classroom resources, materials, lab supplies, remedial and tutorial instruction costs, technical instruction, continuing education programs, and any expenses for organized instructional activities offered for credit within degree or certificate programs.

Operations:

Original definition released in the Budget and Finance Committee Packet on January 2, 2026:

~~Operational costs, also known as institutional support, are administrative and infrastructure expenses necessary for the colleges' functionality but are not directly tied to teaching. These encompass general administration costs such as executive leadership, HR, and finance, the operation and maintenance of the plant including utilities, custodial services, and building repairs, student services of admissions, registrar, counseling, and athletics, institutional support covering legal, fiscal operations, and IT systems, as well as auxiliary enterprises like housing, dining, and parking. Operational costs exclude capital improvements to facilities.~~

After conversations with the technical college leadership about their challenges and processes, on January 6, 2026, the definition was updated to:

Operational costs are administrative and infrastructure expenses necessary for the colleges' functionality but are not directly tied to teaching. These include administration, student services, institutional support functions, auxiliary enterprises, facilities, and buildings.

Recommendation:

Because the needs of each institution may vary, it is recommended that each institution present their planned activities and measurable objectives to the Budget and Finance Committee of the TEA and the full TEA.

Proposed timeline:

March – Budget & Finance Committee meeting – four technical college presentations of proposed activities

April – Budget and Finance Committee meeting– three technical college presentations of proposed activities

May – TEA meeting – the Authority reviews and approves the proposed activities

July – Technical colleges submit their reports of the activity results

August – Budget and Finance Committee meeting – the Committee reviews the results

August – TEA meeting – the Authority reviews the results

The following format may be utilized to collect information on activities and results:

Planned Activity (Provide concise description)	Type of Cost: Instructional or Operational?	Budgeted Expenditure Amount	Measurable Objective (March/ April)	Measurable Result (August)

V. B. 1. Receive a presentation from SkillsUSA Officers**Eric Tincher, State Director****Summary**

SkillsUSA is a national nonprofit organization that prepares middle school, high school, and college students for careers in skilled trade and technical fields through hands-on training, leadership development, and industry-aligned competitions. The TEA will receive a presentation from the State of Kansas Officers.

Background

SkillsUSA is a national nonprofit organization dedicated to preparing students for careers in skilled trades, technical professions, and leadership roles. It serves middle school, high school, and postsecondary students enrolled in career and technical education (CTE) programs across the United States.

The organization integrates hands-on technical training, workplace readiness, and leadership development to meet current workforce needs. SkillsUSA works closely with industry partners to ensure students learn skills aligned with real-world standards and employer expectations.

A core component of SkillsUSA is its competitive events program, which includes over 100 contests in fields such as manufacturing, construction, health sciences, information technology, transportation, hospitality, and public safety. Students advance through local, state, and national competitions, gaining practical experience and professional recognition.

Beyond competition, SkillsUSA emphasizes professional skills such as communication, teamwork, ethics, and employability. Members also benefit from networking opportunities, scholarships, and career connections.

Overall, SkillsUSA plays a vital role in strengthening the U.S. workforce by developing skilled professionals who are career-ready, leadership-oriented, and committed to community responsibility.

V. B. 2. Receive information on Ability to Benefit

**Julie Clark, Associate Director
for High School Equivalency**

Background

The Workforce Innovation and Opportunity Act (WIOA) is organized into four main titles, each covering a different part of the workforce system:

- Title I: Workforce Development Activities focus on job training and employment services for various groups including, but not limited to, adults, dislocated workers, and youth programs.
- Title II: Adult Education and Family Literacy Act support adult education, literacy, English language acquisition, and integrated education and training.
- Title III: Wagner-Peyser covers employment services, including job search assistance, labor exchange services, and labor market information (often delivered through American Job Centers)
- Title IV: Vocational Rehabilitation provides services to individuals with disabilities to help them prepare for, obtain, retain, or advance in employment.

Overall, WIOA is designed to help job seekers access employment, education, training, and support services to succeed in the labor market; while also helping employers connect with the skilled workers they need to compete in a global economy. WIOA emphasizes alignment between workforce development, adult education, vocational rehabilitation, and economic development systems to ensure that individuals—particularly those with barriers to employment—receive coordinated, demand-driven services. The Act prioritizes work-based learning, career pathways, and employer engagement, with a strong focus on measurable outcomes and accountability across all partner programs.

The Adult Education system in Kansas plays a vital role as part of the state's comprehensive workforce solution, helping individuals gain foundational skills, earn high school equivalency credentials, and transition into postsecondary education and training. By providing accessible pathways for adults to improve literacy, numeracy, and workplace readiness, the state's adult education programs support economic development and meet labor market demands by preparing a skilled, adaptable workforce for employers across the state.

Ability to Benefit

Adults in Kansas who lack a high school diploma are currently limited in their access to federal Title IV financial aid, which restricts their participation in postsecondary education and workforce training. The Ability to Benefit (ATB) federal provision offers alternative pathways for these individuals to gain financial aid eligibility. It is critical for Kansas to fully utilize available ATB options, including the development of a state-defined ATB process, to expand educational and career opportunities for this population, support workforce needs, and enhance the success of initiatives like Accelerating Opportunity: Kansas (AO-K).

The ATB provision allows adults without a high school diploma to become eligible for Title IV aid through one of three federally recognized options:

- Passing an approved ATB test
- Completing six college credit hours (or 225 clock hours) applicable to a degree or certificate
- Enrolling through a state-defined ATB process approved by the Secretary of Education

The state is actively developing a state-defined ATB process with the aid of the Dual Enrollment for Adult Learners (DEAL) technical assistance project. This new process is intended to support AO-K and other Integrated Education and Training (IET) programs by enabling Title IV eligibility for non-tiered courses not covered by the AO Proviso, thus removing barriers to rapid student advancement into credentialed coursework. Kansas may use the six-credit/225-hour route and the testing alternative in the future.

The state-defined ATB model for Kansas aligns with federal guidelines and supports broader access to workforce training and post-secondary education. This process is being crafted to ensure rigorous monitoring and reporting, while targeting the practical needs of students and institutions.

Seward County Community College will lead implementation support for community colleges; Manhattan Area Technical College will lead implementation support for technical colleges. KBOR will provide coordination and financial-aid compliance guidance.

This issue paper is informational only. No action or vote is requested from the TEA currently. The Kansas Board of Regents Workforce division will continue to provide updates and seek input as the state-defined ATB process is developed and submitted for federal approval.

V. B. 3. Act on Academic Year 2026-2027 Excel in Career Technical Education (CTE) Fees

**Charmine Chambers, Director
Workforce Development**

Summary

To enhance the talent pipeline for Kansas business and industry, the Legislature enacted the Excel in CTE initiative to provide state-financed colleges tuition for high school students in postsecondary technical education courses. Per statute (K.S.A. 72-3810), the Kansas Board of Regents shall establish general guidelines for tuition and fee schedules in career technical education courses and programs. The Excel in CTE tuition and fee schedule of every technical education program shall be subject to annual approval.

Background

K.S.A 72-3810 states:

“All tuition and fees charged for career technical education by any board shall be in such amounts as are authorized by rules and regulations adopted by the state board which shall establish general guidelines for tuition and fee schedules in career technical education courses and programs. The tuition and fee schedule of every career technical education program shall be subject to annual approval of the state board. A current complete schedule of tuition and fees for each career technical education course and program of each board as approved by the state board shall be maintained on file in the office of the state board and shall be open for public inspection at any reasonable time.”

“Fees means those charges assessed against a student by a community college, technical college or the institute of technology for student services, such as health clinics, athletic activities and technology services, or for books, supplies or other materials necessary for a particular course or program, the expense of which is not covered by tuition.”

“Tuition means those charges assessed against a student by a community college, technical college or the institute of technology on a per credit hour, per course or per term basis, and that are charged to cover the general expense of providing instructional services.”

As per the request of the Postsecondary Technical Education Authority (TEA), on Thursday, December 19, 2019, representatives from community colleges, technical colleges, and Board staff met to set guidelines for fees associated with Excel in CTE courses and programs. As a result of this meeting, agreed-upon allowable fees include items/services students take with them and industry-specific fees required for entrance/acceptance into the program.

Allowable fees include:

- Uniforms
- Personal protective equipment
- Background checks
- Fingerprints
- Drug tests
- E-subscriptions/E-books
- Textbooks
- Printing fees for textbooks/E-books
- Certification tests
- Membership fees for certifying bodies
- Liability insurance (example: student malpractice)
- Graduation fees (if applicable)
- Transcript fees (if applicable)
- Student Software Licenses

Unallowable fees include:

- Student fees (general)
- Technology fees
- Health fees
- Consumable project materials
- Program or Institution Application fees
- Lab Fees
- Equipment / tool maintenance, usage, replacement
- Rental (such as tools, books, or uniform/gear)
- Student kits
- Accuplacer or other placement tests
- Student ID
- Student organization memberships (such as Skills USA)

- Professional Equipment/Kits/Tools students purchase
- Fees charged on a per-credit-hour basis
- Any other fee not on the allowable list

The AY2027 Excel in CTE Fees submitted by institutions are based upon the Reporting Process recommended by the Excel in CTE Fee Task Group in May 2025.

Reporting Process:

- Report all required fees/costs that a student MUST have to participate in a course/program for Excel in CTE
 - Full cost/fee is the amount to be reported
 - Regardless of who pays the fee/cost
 - No further reporting of “optional” items
- Fees submitted must be those applicable from the approved list
- The TEA requested a brief narrative from each institution that helps provide more context around their “fee process” in general.

KBOR staff provided a webinar, updated FAQ documentation, provided a PowerPoint reference, and a webinar recording on 9/10/2025 for institutions.

Documents attached to this meeting packet include:

- Course and Program Updates by Institution, which is a course-by-course list of requested fee increases and changes for each institution for AY2027.
- AY2026 to AY2027 Comparison Totals by Program and Institution, which is the comparison spreadsheet with the revised fee requests by program area for each institution.
- AY2027 Fee Process Narratives by Institution – includes narratives submitted by each institution to provide general context around their Excel in CTE fees.

V. B. 4. Update from the Excel in CTE Taskforce

**Charmine Chambers, Director
Workforce Development**

Summary

K.S.A. 72-3819 established the Excel in CTE Initiative, which funds postsecondary technical courses for high school students and, when available, provides incentives for industry-recognized credentials. Funding is appropriated to the Kansas Board of Regents to reimburse colleges. Participation has grown steadily since 2013, with a FY2025 fiscal impact of approximately \$47 million.

The Kansas Postsecondary Technical Education Authority identified challenges around rising costs and the need for greater accountability. A taskforce recommended:

- 1) No funding for retakes and development of system-wide guidelines,*
- 2) Consistent placement measures using existing Multiple Measures initiatives, and*
- 3) Funding prioritization aligned with Kansas Promise Act Scholarship eligible programs in high-demand, high-wage, or critical-need fields.*

These recommendations were approved and incorporated into AY2026 goals to guide future program evaluation and funding decisions.

Background

K.S.A. 72-3819 established the Career Technical Education Incentive Program, commonly known as the Excel in Career Technical Education (CTE) Initiative. The initiative provides state-financed tuition for high school students enrolled in postsecondary technical education courses, and—when funds are appropriated—incentive payments to school districts for students earning industry-recognized credentials in high-demand occupations.

Funding for Excel in CTE is appropriated to the Kansas Board of Regents (Board) to reimburse participating community and technical colleges for the costs associated with delivering approved postsecondary CTE courses to eligible high school students. Since its inception in 2013, participation in the Excel in CTE program has grown steadily each year, reflecting strong demand from students and employers for career-aligned technical education opportunities across Kansas.

At its meeting on August 21, 2025, the Kansas Postsecondary Technical Education Authority (TEA) discussed two major challenges related to the Excel in CTE program, the growing fiscal impact of the program (estimated at approximately \$47 million), and the need for stronger accountability measures to ensure a clear return on investment for state funding.

Following extensive discussion, the TEA formed a taskforce to gather additional data, define success metrics for Excel in CTE, and develop recommendations to guide future program evaluation and funding decisions. The Excel in CTE Taskforce included representatives from the community and technical college sectors, TEA members, and Board staff. The group met on October 7, 2025, October 15, 2025, and December 10, 2025, and developed three recommendations along with recommended standards for policy and procedures:

- 1) Retakes and Funding Eligibility
 - Recommendation: Course retakes should not receive funding through Excel in CTE.

Recommended Policy and Procedures: If a student fails a course funded by Excel in CTE, that student is not eligible to re-take the same course paid for with Excel in CTE. The student would be required to pay for it on their own should they decide to re-take the course. Additionally, it is assumed that the student falls under the academic progress policy for the institution and would receive additional coaching and interventional assistance from the institution when taking additional coursework.

2) Placement Measures and Academic Alignment

- Recommendation: Utilize the existing Multiple Measures initiatives—including the Math Pathways and English Initiatives—to inform student placement decisions.

Recommended Policy and Procedures: Recommended minimum requirement that the student is on track for on-time graduation from high school and maintains a minimum GPA of 2.0. The group discussed other measures that might be considered, including Pre-ACT scores, completion of high school algebra, Accuplacer scores, high school reading assessments, and Work Keys assessments.

3) Funding Prioritization Framework

- Recommendation: Use the Kansas Promise Act Scholarship eligible program framework to focus Excel in CTE funding. Promise Act Scholarship eligible programs must fall within the areas of study identified by the legislature as priority workforce areas, and corresponding occupations must be designated as high-demand, high-wage, or critical-need.

Recommended Policy and Procedures: 28 additional programs were reviewed for Academic Discipline eligibility and High Demand or High Wage ranking for 2025. 19 programs were recommended for approval, and seven programs were not recommended for approval. Additional information was requested concerning the Unmanned Aircraft Systems (UAS) programs from Cloud County Community College and WSU Tech as there is currently not a Standard Occupational Code (SOC) available by which demand or wages may be evaluated.

Documents attached to this meeting packet include:

- Program Update – this shows all programs in AY2026 in KHEDS, and the status of the program based upon Promise Act eligibility requirements.
- UAS K-TIP – this includes several years of K-TIP outcomes for the UAS programs, and the AY2022 – AY2024 data which will be utilized for Program Review.
- UAS Employer Engagement – this includes information submitted by WSU Tech and Cloud County Community College for evaluations of demand and wages. Supplemental data from Lightcast is also provided.

V. B. 5. Review and Discuss Tiered Course Designation

**Charmine Chambers, Director
Workforce Development**

Summary

K.S.A. 71-1802 provides a series of descriptors related to the content, purpose, design, and inclusion of applied instruction of courses to guide the designation of “Tiered Technical Course” and “Non-Tiered Course” status. The Course Bucket Review process initiated in 2023 has identified courses which require review to ensure statutory alignment.

Background

Senate Bill 143, enacted during the 2011 Legislative Session, established a new postsecondary technical education formula to be used for technical education (tiered technical education state aid) and for “transfer”, “general education”, and general instruction credit hours (non-tiered course credit hour grant). The KBOR Instructional Cost Model calculates costs at a course level and recognizes the cost differential in delivering technical education courses for all state funding line items.

When the Instructional Cost Model was developed, K.S.A. 71-1802 definitions were used to designate each program course as “Tiered” or “Non-Tiered”:

“(f) “Non-tiered course” means any postsecondary credit-bearing course offered by an eligible institution and identified by the state board as not meeting the definition of a tiered technical course. Non-tiered courses include courses that are generally designed to:

- (1) Contribute to academic knowledge or skills across multiple disciplines and occupations, such as communication, writing, mathematics, humanities, social or behavioral science and natural or physical science courses, some of which may be considered for transfer as general education credit toward a baccalaureate degree;*
- (2) contribute to general knowledge or skills in areas such as critical thinking and reasoning, problem solving, use of technology and teamwork skills;*
- (3) provide instruction in basic or foundational skills necessary for individuals to effectively participate in technical programs;*
- (4) prepare individuals for certification or licensure exams or re-certifications and skill updates; or*
- (5) allow individuals to explore various career opportunities. Seminars, workshops or other courses that are supplemental to the primary instruction required for the occupationally specific technical program shall be considered non-tiered courses, unless otherwise specified by the state board.”*

“(j) “Tiered technical course” means

- a postsecondary credit-bearing course*
- included in the sequence of courses comprising a technical program,*
- which course is itself designed to provide competency-based applied instruction to prepare individuals with occupationally specific knowledge and skills necessary for employment, and*
- which the state board has identified as a tiered technical course.”*

The Course Bucket Review Process initiated in 2023 has identified courses which are identified for Systemwide Transfer by the majority of two-year institutions, appear to be utilized consistently as general education within technical and transfer programs, and do not include competencies or activities demonstrating applied instruction. Therefore, these courses cannot be accurately assigned to a single program based upon use by institutions in multiple programs.

Recommendation

Based upon the above review, KBOR staff is recommending Program and Curriculum Committee assessment of courses based upon the Tiered course definition. The committee will review, validate and recommend reclassification of tiered course designations based on the existing framework where the course clearly aligns with the non-tiered criteria. Any courses lacking clear alignment with criteria be presented to the TEA for consideration.

VI. Next Meeting Reminder

Instructional Cost Model: State Aid to Community and Technical Colleges For Delivery of Courses

Elaine Frisbie, VP for Finance & Administration

January 8, 2026

Instructional Cost Model

★ **State Aid: Tiered, Non-Tiered, Excel in CTE Courses**

- ★ 2011 SB 143 created a new postsecondary technical education formula.
- ★ The model was developed to identify the colleges' direct and indirect expenses to deliver academic courses to Kansas resident students and calculate the state's share of those costs based on available data from the colleges.
- ★ It is not intended to address colleges' costs for non-resident students, nor for other campus functions outside the delivery of instruction (e.g., residence halls or athletics).
- ★ Annual inflation adjustments are applied throughout so that colleges' increased costs are recognized.

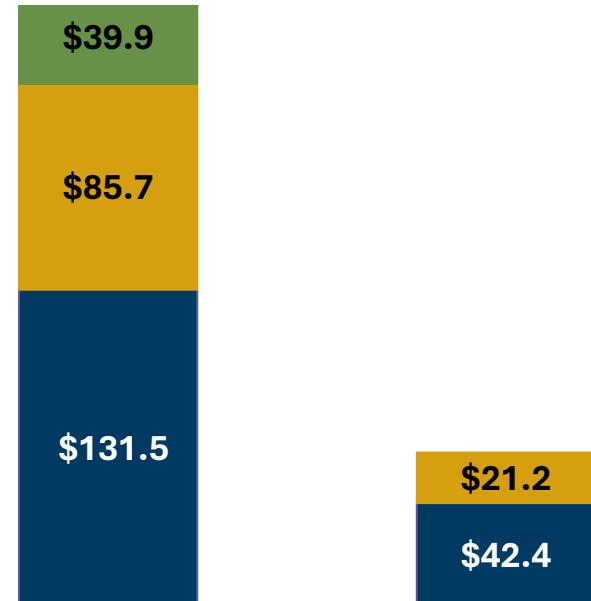

Instructional Cost Model

The cost model also calculates the state's share for colleges' costs to deliver courses to Kansas resident students:

- ★ Community College In-District Credit Hours =
1/3 student, 1/3 property tax, 1/3 state
- ★ Community College Out-District Credit Hours =
1/3 student, 2/3 state
- ★ All Technical College Credit Hours =
1/3 student, 2/3 state
- ★ Secondary Students in Excel in CTE =
100% state

**AY 2025 Cost Model Calculations
Tiered and Non-Tiered Courses**
(*Dollars in Millions*)

Community Colleges Technical Colleges

■ State Aid ■ Tuition ■ Property Tax

Instructional Cost Model

★ How are Instructional Costs Calculated in the Model?

At the course level:

Tiered Courses

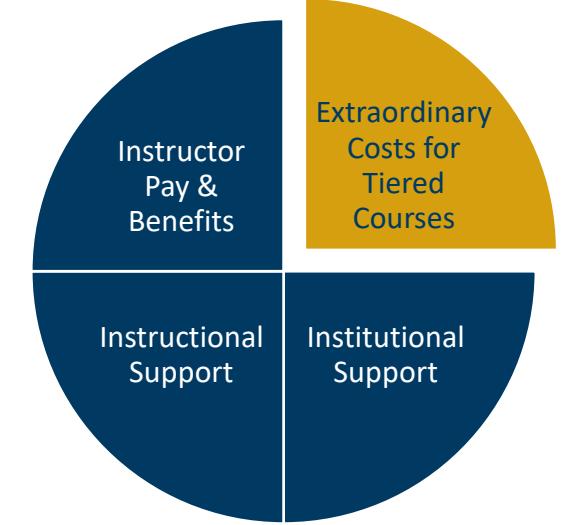

$$\begin{aligned} & (\text{Instructor Costs}) + (\text{Instructional Support Costs}) + \\ & (\text{Institutional Support Costs}) + \text{(Extraordinary Costs)} \\ & = \$ \text{ Course Rate} \end{aligned}$$

Non-Tiered Courses

$$\begin{aligned} & (\text{Instructor Costs}) + (\text{Instructional Support Costs}) + \\ & (\text{Institutional Support Costs}) \\ & = \$ \text{ Course Rate} \end{aligned}$$

$$(\text{Course Rate}) \times (\text{Eligible Student Credit Hours}) = \text{Total Course Cost}$$

Total Course Costs are aggregated at each college to calculate costs.

Instructional Cost Model

Course Rate Elements

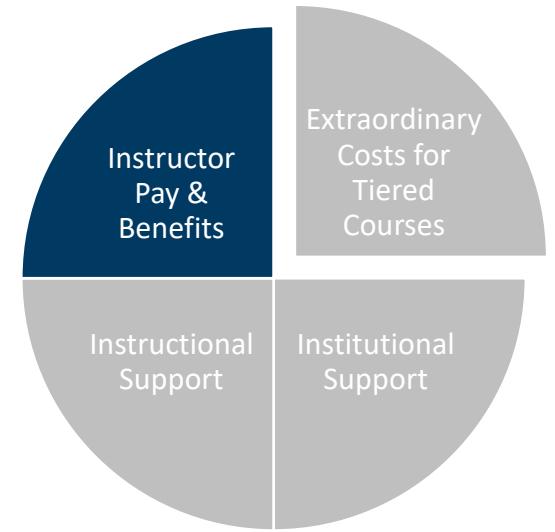

Tiered Courses			
Non-Tiered Courses			Extraordinary Costs
Course Instructor	Instructional Support	Institutional Support	
Three-year average of instructors' salaries and benefits	College functions in support of delivering courses: student services, academic support and public service activities	College overhead: administrative activities necessary to run the college and operate the physical campus	Specialized equipment & materials necessary to deliver technical ("tiered") courses
National Higher Education Benchmarking Institute, housed at Johnson County Community College	Kansas community and technical colleges' annual financial audits and published in Board of Regents' data books	Kansas community and technical colleges' annual financial audits and published in Board of Regents' data books	Kansas community and technical colleges; colleges identified programs with "extraordinary" costs and submitted five years of actual expenditure data (revised to now encompass three years). Costs based on these data were grouped into course tiers and are adjusted annually for inflation, with periodic data refreshes for actual costs.

Instructional Cost Model

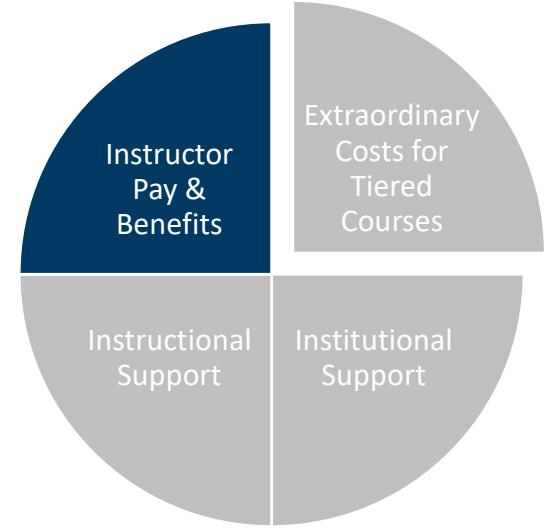

Instructors

- ★ This element captures colleges' costs for faculty – their salaries and employee benefits.
- ★ The data used are a three-year average of the most recent data from the Cost & Productivity Project.
- ★ Based on actual reported costs.
- ★ Not every Kansas community and technical college participates in the study.
- ★ Source: National Higher Education Benchmarking Institute

Instructional Cost Model

Extraordinary Costs

- ★ Those program-specific equipment and consumable materials for technical courses in technical programs.
 - ★ X-ray machine for radiology
 - ★ Welding booths
 - ★ Food for culinary programs
 - ★ Fuel for CDL program
 - ★ Animal Feed for agriculture program
 - ★ Latex gloves
- ★ Costs are based on the colleges' reported data and grouped into tiers from \$0 to \$143 in AY 2025.
- ★ Costs are adjusted annually for inflation or for actual costs, depending on the timing of the review cycle.
- ★ Source: Kansas community and technical colleges currently submit three years of actual expenditure data.

Instructional Cost Model

★ Extraordinary Cost Rate History

Extraordinary Rates	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0
A	\$26	\$27	\$27	\$27	\$28	\$28	\$28	\$29	\$30	\$31	\$31	\$32	\$34	\$35	\$36
B	\$53	\$54	\$55	\$54	\$56	\$56	\$57	\$58	\$59	\$60	\$61	\$64	\$68	\$70	\$72
C	\$105	\$108	\$110	\$108	\$112	\$112	\$113	\$115	\$118	\$120	\$121	\$127	\$135	\$139	\$143

Instructional Cost Model

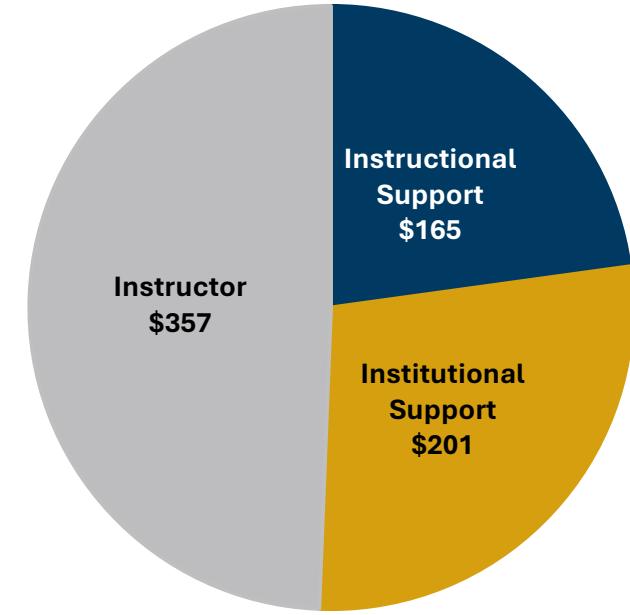

Non-Tiered Courses

(Instructor: \$119) + (Instructional Support: \$55) + (Institutional Support Costs \$67)

= \$241 Course Rate X 3 Credit Hours = \$723

Each three-hour non-tiered course generates a per-student “cost” of \$723, with about one-half attributable to the instructor and the rest to the overall college.

Example: a non-tiered course delivered to 15 students in a semester calculates \$10,845 in the cost model ($15 \times \$723$) for AY 2025. The state’s share is then calculated based on the residency of enrolled students.

The cost model calculated the state’s total share for all non-tiered courses at \$97.4 M for AY 2025 (770,481.5 SCH).

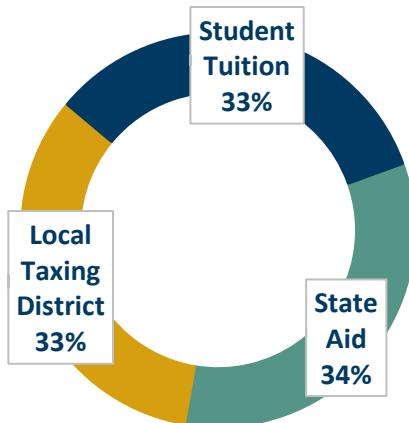

Instructional Cost Model

★ Financing of the Costs

How is the Financing Determined?

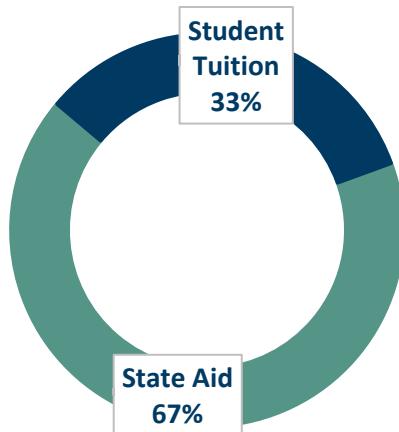

At the Student Credit Hour (SCH) level.

Community College
In-District SCH

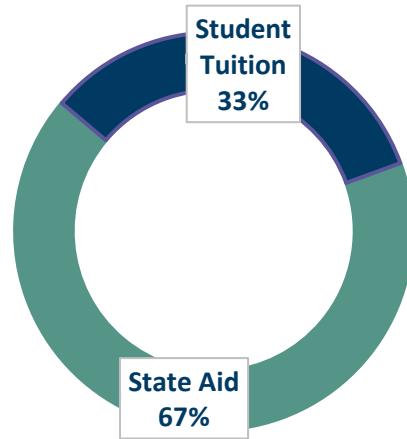

39.2% of T/NT Courses

Community College
Out-District SCH

44.5% of T/NT Courses

All Technical College SCH

16.3% of T/NT Courses

Secondary Students
in Excel in CTE SCH

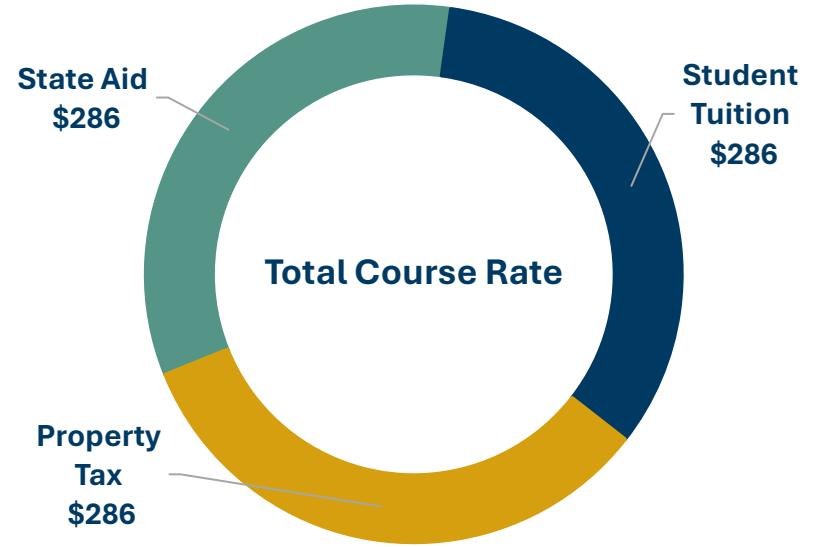

State Aid
100%

Instructional Cost Model

★ Example Students

- ★ John is an in-district student at Green Valley Community College, studying Computer and Information Systems, enrolled in Applied Networking 1

Instructional Cost Model

★ Example Students

- ★ Jane is a student at Russell Area Technical College (all technical college students are “out-district” for cost model calculations) studying Wind Energy Technology, enrolled in Small Wind Turbine, (Tier Rate 3)

Instructional Cost Model

★ Example Students

★ Jordan is a high school student at the Sunflower State University Campus of Applied Technology, studying Heavy Equipment Technology, enrolled in Fuel & Exhaust Systems, (Tier Rate 6) through the state's Excel in CTE program

Applying the Instructional Cost Model Calculations to Allocate State Aid

Instructional Cost Model

★ Instructional Cost Model for Kansas Resident Students

- ★ The Board of Regents distributed state aid in accordance with the statutes and budget provisos from FY 2012 through FY 2023.
- ★ An example from 2013 SB 171 is shown for the tiered appropriation.

Postsecondary tiered technical education state aid \$58,300,961
Provided, That if the amount of moneys appropriated for the above agency for the fiscal year ending June 30, 2014, in the postsecondary tiered technical education state aid account is greater than the amount of moneys appropriated for the above agency for the fiscal year ending June 30, 2013, in the postsecondary tiered technical education state aid account, then the difference between the amount of moneys appropriated for the fiscal year 2014 and the amount of moneys appropriated for the above agency fiscal year 2013 shall be distributed based on each eligible institution's calculated gap, according to the postsecondary tiered technical education state aid act, K.S.A. 2012 Supp. 71-1801 through 71-1810, and amendments thereto, as determined by the state board of regents:

Provided further, That no eligible institution shall receive an amount of money from the postsecondary tiered technical education state aid account in fiscal year 2014 that is less than the amount such eligible institution received from such account in fiscal year 2013, unless the amount of moneys appropriated for the above agency for fiscal year 2013 in the postsecondary tiered technical education state aid account for fiscal year 2014 is less than the amount of moneys appropriated for the above agency for fiscal year 2013 in the postsecondary tiered technical education state aid account; *And provided further*, That if the amount of moneys appropriated for the above agency for fiscal year 2014 is less than the amount of moneys appropriated for the above agency for fiscal year 2013 in the postsecondary tiered technical education state aid account, then each eligible institution shall receive an amount of moneys as determined by the state board of regents.

★ The 2022 Legislature launched a path to recentering state aid over a three-year timeline.

★ Source: Section 109(f), 2022 House Substitute for Substitute for Senate Bill 267.

(f) During the fiscal year ending June 30, 2023, in addition to the other purpose for which expenditures may be made by the above agency from moneys appropriated from the state general fund or from any special revenue fund or funds for the above agency for fiscal year 2023 as authorized by this or other appropriation act of the 2022 regular session of the legislature, expenditures shall be made by the above agency from such moneys for fiscal year 2023 to implement the legislative intent: For fiscal year 2024, to implement the funding formula for the community colleges and technical colleges concerning the postsecondary tiered technical education state aid and non-tiered course credit hour grants so that those community colleges and technical colleges who were overfunded in fiscal year 2023 will receive 50% of the amount of such overfunding and the remaining 50% will be distributed based on each eligible institution's calculated gap; and for fiscal year 2025, to fully implement the funding formula for the community colleges and technical colleges concerning the postsecondary tiered technical education state aid and non-tiered course credit hour grants.

Instructional Cost Model

★ **FY 2023 – Year One of Three (Hold Harmless)**

- ★ 2022 Legislature provided the state funds needed to cover the state's share of AY 2021 cost model calculations for distribution in FY 2023.
- ★ No college received lower tiered or non-tiered state aid relative to FY 2022.
- ★ If a college's enrollment would have resulted in lower state share calculations, the college's state aid was held flat from FY 2022 to FY 2023.

★ **FY 2024 – Year Two of Three (50% Hold Harmless)**

- ★ 2023 Legislature provided the state funds needed to cover the state's share of AY 2022 cost model calculations for distribution in FY 2024.
- ★ If a college's enrollment would have resulted in lower state share calculations, the reduction was reduced by 50%.

Instructional Cost Model

★ FY 2025 – Year Three of Three (Full Adoption)

- ★ 2024 Legislature provided the state funds to cover the full state share of FY 2025 calculated state aid.
- ★ For the first time in the model's history, the calculations were based entirely on college enrollments:
 - ★ 21 of the 26 colleges received less tiered state aid compared to FY 2024
 - ★ 22 of the 26 colleges received less non-tiered state aid compared to FY 2024
- ★ Amounts for distribution were based on the adopted three-year average (using the calculated cost model output for AY 2021, AY 2022, AY 2023)

Using AY 2025 Enrollment Data in the instructional cost model, the colleges' state share is calculated.

That state share is averaged with AY 2024 and AY 2023 to determine the allocation for FY 2027 (July 1, 2026-June 30, 2027).

The FY 2027 allocation is displayed here, with a comparison to each college's FY 2026 allocation.

In total, FY 2027 is **\$5.3 M** higher than FY 2026 for tiered courses. The Board of Regents will advocate this amount be added to the appropriation.

[^] In accordance with 2022 House Substitute for Substitute for Senate Bill 267 Section 109(f) and the recommendations of the 2022 Legislative Committee on Community & Technical College State Funding, FY 2027 allocations are calculated based on an average of the three most recent years (AY 2023, 2024 and 2025), with full adoption of the cost model calculations.

Using AY 2025 Enrollment Data in the instructional cost model, the colleges' state share is calculated.

That state share is averaged with AY 2024 and AY 2023 to determine the allocation for FY 2027 (July 1, 2026-June 30, 2027).

The FY 2027 allocation is displayed here, with a comparison to each college's FY 2026 allocation.

In total, FY 2027 is **\$3.6 M** higher than FY 2026 for non-tiered courses. The Board of Regents will advocate this amount be added to the appropriation.

Non-Tiered Course Credit Hour Grant

AY2027 EXCEL IN CTE FEE NARRATIVES BY INSTITUTION

ALLEN COUNTY COMMUNITY COLLEGE

“Currently, Allen Community College has minimal fee requirements for our classes, so there is no formal process for review and submission. Most of the fees listed are for certification exams and personal clothing items, such as scrubs or boots since we do not house these items within our bookstore.”

BARTON COMMUNITY COLLEGE

“Barton extends minimal charges to students for course fees associated with identified Excel in CTE courses. Typical charges are for books and certification testing. The overall savings to students depends on enrollment from year to year; however, the estimated savings ranges from \$80,000 to \$100,000 annually. Barton's partnerships along with a relatively small Excel in CTE enrollment supports these minimal charges. Barton is committed to supporting Excel in CTE students and workforce development in our service area. We are committed to keeping these fees low as long as we are able to financially support these initiatives. With the continual reduction in Excel in CTE funding and increased cost of materials and supplies for the identified courses, this approach may have to change in the future.”

BUTLER COMMUNITY COLLEGE

“Working within the parameters of the allowable fees, Butler works closely with all vendors, publishers, and stakeholders to reduce cost whenever possible. The cost savings per student varies based on the student's program choice. On average, each Excel in CTE student is saving \$840 per year. This reduced cost is reflected in the AY2026 fees/costs.

This savings has been accomplished using open educational resources (OER) in lieu of textbooks, cohort subscriptions that provide textbooks for multiple classes at one rate, and educational pricing and discounts on tools and equipment. In some programs, the college has been able to secure classroom sets of tools, reducing the cost even further. These efforts have reduced some programs to \$0 for Excel in CTE students. The maximum price students will see on textbooks and equipment are listed in the fee submission. Students can purchase these items used or through other sources which may have different costs.”

CLOUD COUNTY COMMUNITY COLLEGE

“Cloud County Community College covers the cost of all required fees (reg.,comp, building, and tech), which are at \$53 per credit hour for each student, and we estimate the savings to EACH Excel in GTE student at \$53 per credit hour. These fees are submitted in the AY2026 fees/costs.

We work with several USD's which provide some cost coverage for textbooks, either in part or completely, however; since many USD's do not provide this, textbook fees have been submitted for all courses/programs, and those fees reflect what the student would pay if they purchased the textbooks through the college bookstore. Students can purchase textbooks through other sources which may have different costs. These fees are submitted in the AY2026 fees/costs.”

COFFEYVILLE COMMUNITY COLLEGE

“The Coffeyville Community College Foundation covers the cost of all fees for all students in a CTE program. We estimate the average yearly savings to EACH Excel in CTE student is \$150. This total fee/cost savings for all Excel in CTE students is estimated at \$13,000/academic year.”

COLBY COMMUNITY COLLEGE

“USDs do not cover textbook fees for students; textbook fees have been submitted for all courses/programs, and those fees reflect what the student would pay if they purchased the textbooks through the college bookstore. Students have the option to purchase textbooks from other sources, which may cost different amounts. These fees are submitted in the AY2026 fees/costs.”

COWLEY COMMUNITY COLLEGE

“Cowley College covers the cost of all non-course specific required student fees-including general, technology, and activity fees-which total \$90.00 per credit hour. These fees are included in the AY2026 fees/costs submission. We estimate the savings to each Excel in CTE student to be \$90.00 per credit hour. None of our partnership high schools currently cover the cost of textbooks. Therefore, we have submitted textbook fees for all courses and programs. These fees reflect the cost students would pay if purchasing textbooks directly through the Cowley College Bookstore. Students do have the option to purchase textbooks from other sources, which may offer different pricing. These textbook fees are included in the AY2026 fees/costs submission.

Cowley College is fortunate to have the facilities and equipment necessary to provide high-quality education and training at our own campuses. Our high school students learn alongside traditional college students, ensuring a consistent and engaging educational experience. We maintain a standardized fee structure, charging the same course fees to high school and traditional students across all Cowley College campuses. These course fees are included in the AY2026 fees/costs submission.

Additionally, our website provides a comprehensive list of all course fees and background check requirements, where students can view tuition and fee costs per credit hour. These fees are also reflected in the AY2026 fees/costs submission.”

DODGE CITY COMMUNITY COLLEGE

“Dodge City Community College collaborates with multiple school districts, some of which provide provisions for textbooks or personal protective equipment (PPE). The AY2027 fees/costs submitted represent the maximum potential cost to students. Actual expenses may be reduced for certain students based on allowances granted by their respective school district.”

FLINT HILLS TECHNICAL COLLEGE

“Our foundation offers high school scholarships to help offset fees and tools for high school students. The Jones Technical Education Scholarship covers up to \$500 in grant assistance per academic year for students residing in Lyon, Coffey and Osage Counties. There is no GPA requirement the first semester; however, students must maintain a 2.0 GPA thereafter. This scholarship assists with college fees, tools, supplies and books. This scholarship is awarded automatically each academic year.

The Rathke Scholarship offers grant assistance to high school students enrolled in technical programs. To be eligible, students must have a 2.5 GPA and reside in Chase, Coffey, Greenwood, or Lyon Counties. Recipients must maintain a 2.0 GPA each semester to remain eligible. Students must apply for this scholarship each academic year, and while the priority deadline is March 1, applications may still be submitted after that date. The Rathke Scholarship helps cover the cost of fees, tools, and supplies.

Students attending the Garnett and La Harpe locations will have their tools and books provided by their respective USDs.

Not all high school students qualify for scholarships or receive USD funding, we have submitted the costs for tools, supplies and textbooks to the AV 2026 Excel in CTE Fees and Costs collection.

Students can purchase their textbooks through our online bookstore or other sources which may have different costs.”

FORT HAYS TECH | NORTH CENTRAL

“Our institution covers certain costs for our Excel in CTE students in specific courses and programs that are submitted in the AY2027 costs.

For students enrolled in the Automotive Collision and Refinishing Technology, Automotive Technology, Diesel Technology, and Plumbing, Heating and Air Conditioning Programs, the college covers the cost of

personal protective equipment like safety glasses, hearing protection, and jersey gloves retained by the student, which reduces the cost for each student.

Our institution also covers the cost of name tags for our Nurse Aide and Medication Aide programs, and we utilize free online educational guidelines from the Kansas Department of Health and Environment to lower the cost of these programs for our students.

For our online CDL 105 and OSHA 110 courses, our institution covers the cost of the learning software so that Excel in CTE students do not have any out-of-pocket costs.

Our institution and our USD partners also provide and retain certain items from year to year for specific programs. These items are not eligible to be included in the AY2027 cost submission.

Construction Technology and Welding Technology are programs offered only at specific USD locations that provide and retain all tools, textbooks, and materials necessary, excluding the AWS Sense certification that is submitted in the AY2027 costs.

Similarly, some programs located on our campus provide and retain all the necessary tools and textbooks, excluding those submitted in the AY2027 costs—these include Auto Collision and Refinishing Technology, Automotive Technology, Culinary Arts, Diesel Technology, Information Technology, Plumbing, Heating and Air Conditioning, and Powersports Technology.

Many of our programs utilize a Cengage Unlimited subscription to reduce textbooks costs for our students, which is submitted in the AY2027 collection.”

FORT HAYS TECH | NORTHWEST

“All costs and fees for high school students enrolled in Excel in CTE courses and programs are listed on the respective program pages, alongside the course outlines/degree maps.

For regular post-secondary students, cost information is available through multiple sources, including the public online catalog, the estimated cost sheet, or by contacting the bookstore directly.”

FORT SCOTT COMMUNITY COLLEGE

“Fort Scott Community College identifies the need for non-general fees when costs arise that exceed institutional and state funding streams, such as Tiered or Excel in CTE funding. These additional costs are chiefly for 'items the students take with them' after concentrating in a technical program, such as books, uniforms, tools, testing and licensing fees, and similar items.

FSCC faculty and staff solicit donations for course materials such as steel for welding to continue to provide sustainable, affordable programs that meet student needs. We include student tools and uniforms in our Excel in CTE Fee Collection because donations do not cover these items. The Academic Office and Business Office collaborate with our career and technical faculty to determine the fees and amounts that are submitted in the Excel in CTE Fee Collection.

The college takes proactive steps to reduce costs for students when possible. For example, the college negotiated a more affordable OSHA 10 testing fee for AV 2026 through partnership with CareerSafe. FSCC also seeks partnerships to provide coverage for the costs associated with textbooks, including agreements with region high schools and NCCER.”

GARDEN CITY COMMUNITY COLLEGE

“In the majority of GCCC's Excel in CTE options, the college budgets for the cost of course delivery that would normally be covered by fees for non-high school students. We do this by tracking enrollment by students and booking the fees cost as a receivable that is covered by the Excel in CTE reimbursement.”

HIGHLAND COMMUNITY COLLEGE

“High school students do not pay for any industry-recognized certification testing within their programs. Some certifications allow students to retake the exam at no additional cost. However, if a student does not pass the first certification test and a retake fee applies, that cost is passed on to the student. These potential retake fees are listed within each program's fee schedule.

High school students are loaned textbooks for their courses; as long as the books are returned in good condition, no charges are assessed. If students are good stewards of their materials, they should not incur any additional costs. These fees are not included in the AY2026 CTE submission.

HCC waives student fees and book rental/charges for each high school student. We estimate this provides a savings of approximately \$7,247 per Excel in CTE student. See attached for the program breakdown.”

HUTCHINSON COMMUNITY COLLEGE

“Hutchinson Community College works with several USD's which provide cost coverage for textbooks for the classes listed on this page, either in part or completely, however; since many USD's do not provide this, textbook fees have been submitted for all courses/programs, and those fees reflect what the student would pay if they purchased the textbooks through the college bookstore. Students are able to purchase textbooks through other sources which may have different costs. These fees are submitted in the AY2026 fees/costs.”

INDEPENDENCE COMMUNITY COLLEGE

“Independence Community College's Excel in CTE fees are tied to courses and programs which lead to high need/high demand credentials. These fees include professional kits providing students with the latest equipment used in the field. These kits provide them with equipment they can take with them to their employment opportunities.

In addition to professional kits there are multiple classroom kits provided to students. This allows them even more opportunities to use the latest equipment and products found in the field while keeping student costs low.

The Welding program allows students to purchase their own PPE so that they can acquire what fits and works best for them as individuals. The College provides classroom PPE for those who are not ready to purchase their own. This allows students to be exposed to different PPE and then choose what works best for them.

Independence Community College is constantly working with vendors/suppliers to ensure students are provided the best equipment for the industry while keeping costs low.”

JOHNSON COUNTY COMMUNITY COLLEGE

“For Johnson County residents, JCCC's tuition is \$85 per credit hour with a \$16 per credit hour fee for all students. The per credit hour fee supports Student Activities=\$7, Debt Reduction=\$5, Parking and Roads=\$3, and Sustainability Initiatives=\$1.

For Excel in CTE courses, each academic year, the most prevalent cost increases are related to textbooks, adding equipment/supplies that may not have been included in a prior submission, or having a new program in the comparison that was not present in a previous academic year.

With regard to textbooks, JCCC is reporting the “new” textbook price when purchased at the JCCC Bookstore. Today, students have many options with securing textbooks, and there is no expectation that books will be purchased from the JCCC Bookstore.

Most supplies, equipment, and personal protective equipment may be purchased at the student’s vendor of choice, and costs may vary by vendor. Amounts included in the Excel in CTE Fee collection are based on purchasing new items from the JCCC Bookstore.

For Excel in CTE courses offered in the high schools as part of our Concurrent Enrollment Program, JCCC covers the textbook costs.

For Blue Valley School District students attending on-campus Excel in CTE courses, the school district covers the cost of books/supplies.

For Certified Nursing Assistant (CNA) courses, JCCC covers the following costs:

- Background & Drug Screen: \$65 per student
- Certification Exam \$18 per student
- License Fee: \$20 per student
- Insurance: \$13 - \$16 estimate per student

Many high schools cover the gait belt, scrubs, and textbook costs associated with the CNA Program”

KANSAS CITY KANSAS COMMUNITY COLLEGE

“KCKCC faculty work closely with business and industry partners—including textbook vendors—to secure the greatest possible discounts and cost reductions, which are then passed directly on to students. Kansas City Kansas Community College (KCKCC) maintains a strong commitment to fiduciary responsibility and to supporting students enrolled in Excel in CTE courses and programs. Many of KCKCC’s high school partners elect to pay some or all associated Excel in CTE course fees on behalf of their students. In these cases, KCKCC invoices the high schools directly.

When a high school chooses not to cover a particular fee, KCKCC issues the invoice directly to the student. This dual-path billing process is administered and monitored by staff in the KCKCC Business Office to ensure accuracy, transparency, and consistency.”

LABETTE COMMUNITY COLLEGE

“Labette Community College works closely with local business and industry partners to reduce costs for students participating in Excel in CTE courses. For example, several area employers and community partners donate metal and consumable materials used in the Welding program, resulting in an estimated savings of approximately \$50 per student each semester. Additionally, local hospitals and healthcare providers frequently donate medical supplies and training materials used in HEAL courses, allowing students to gain valuable hands-on experience without additional lab supply costs which would be about \$15 per student.

We work with several USD's which provide cost coverage for textbooks, either in part or completely, however; since many USD's do not provide this, textbook fees have been submitted for all courses/programs, and those fees reflect what the student would pay if they purchased the textbooks through eCampus, the college's online bookstore. Students are able to purchase textbooks through other sources which may have different costs. These fees are submitted in the AY2027 fees/costs.”

MANHATTAN AREA TECHNICAL COLLEGE

“Manhattan Area Technical College maintains a transparent and student-centered approach to program and course-related fees. Fees submitted for AY2026 reflect the actual costs that Excel in CTE students may incur, including textbooks, certification tests, e-learning subscriptions, liability insurance, and professional equipment/tool kits required for specific programs.

Fee amounts are determined based on what students would pay if purchasing materials directly through the college's recommended vendors or bookstore. For example, students in Automotive Technology and HVAC programs are required to obtain a one-year Cengage Unlimited e-textbook subscription at \$199.99, while Welding students access Curriculum Labs for \$235. Equipment kits, such as those for Industrial Maintenance and Plumbing programs, are submitted at their discounted retail cost (\$1,480 and \$2,503 respectively), as these are essential for hands-on coursework and not always covered by external funding. The College actively works with local school districts to secure cost coverage for textbooks and other fees; however, district-level support varies considerably. Where a USO or community partner fully or partially offsets textbook costs, the fee is not directly billed to the student. In cases where no external sponsorship exists, fees reflect out-of-pocket costs. This process ensures all students have equitable access to required resources, regardless of external support.

Where possible, Manhattan Tech leverages business and industry partnerships and its own 501 c3 Foundation to subsidize certain student expenses. However, these partnerships are program-specific and fluctuate based on current funding availability. Submitted fees for AY2026, therefore, present a consistent, college-wide estimate of costs for every Excel in CTE student, ensuring transparency and comparability between institutions.”

NEOSHO COMMUNITY COLLEGE

“We work with several USD's which provide various cost coverage for textbooks, and in some cases certification exams either in part or completely, however; since some USD's do not provide this, textbook and certification exam fees have been submitted for all appropriate courses/programs, and those fees reflect what the student would pay if they purchased the textbooks through the college bookstore or the certification exam from the providing organization. Students are able to purchase textbooks through other sources which may have different costs. These fees are submitted in the AY2027 Excel in CTE Fee Collection.”

PRATT COMMUNITY COLLEGE

“Pratt Community College works with several of the USDs in our service area who provide textbooks for their students. However, some of the high schools do not provide textbooks so fees for required textbooks are submitted in the AY2027 fees/cost.

Two of our high schools provides tools for their students to use in the automotive and welding programs held on their campuses. A third high school sending students to the Pratt campus has purchased a toolbox and tool set which is kept in the automotive shop. Those tools are dedicated for use only by students from that school. PCC is also purchasing an additional toolbox tool set which will be reserved for use by students from other high schools taking auto classes on-campus. PCC is working with a tool supplier to offer tools at a discounted price should the student still want to purchase their own set of tools. However, the automotive program on the Pratt Campus is no longer requiring high school students supply their own toolbox and tool set. This will be a substantial savings to the student (estimated at \$4,300).

ASE certification exams are encouraged but not required to be taken by high school students. However, the college will pay for these exams and most of the students do choose to take them. The AWS welding certification exams are required of all students in the welding program, but the college also pays for these exams.

For transparency, the PCC website includes a list of all CTE programs and courses and the corresponding fees. Tuition and general fees for other non-CTE courses are also noted in the College Start Cost Information. These courses also have reduced costs. Pratt County students attending Pratt High School, Skyline High School, or the Pratt Learning Center pay a \$39 tuition and fees per credit hour cost (a savings of \$100 per credit hour). A list of courses offered to other high school students within our service area for \$49 tuition and fees (a savings of \$90 per credit hour) is posted on the PCC website in the College Start information.”

SALINA AREA TECHNICAL COLLEGE

“Salina Area Technical College has consistently maintained low Career and Technical Education (CTE) fees over the years. Students are only charged for uniforms—which they keep—along with e-subscriptions and testing fees. Through COVID-19 grant funding, the college was able to purchase additional tool sets, ensuring that students had the necessary equipment without the need for sharing. Students are only charged for tools if one is lost or damaged due to improper use. High school students rent program books at no cost, as the college covers the expense. By leveraging COVID-19 funding and the dedicated efforts of our faculty to ensure books are returned each semester, we have been able to keep student costs to a minimum.”

SEWARD COMMUNITY COLLEGE

“At Seward County Community College (SCCC), we are committed to providing students with high-quality, affordable career and technical education opportunities. While students are charged for certain certification and testing fees, SCCC actively collaborates with industry vendors to secure the most cost-effective options available.

Through support from the SCCC Foundation and strong business and industry partnerships, the college helps offset certification expenses for students across multiple programs. For example, foundation funds are used to share the cost of the AMPP CPI certification, and both foundation and industry partnership funds assist Nursing students with NCLEX testing fees.

Several regional Unified School District (USD) partners also contribute significantly to reducing student costs. For instance, USD 480 covers the full cost of OSHA certification and associated fees for their students, and other USD partners frequently provide funding for textbooks, testing, and course-related fees. These collaborations ensure high school students enrolled in Excel in CTE programs experience minimal out-of-pocket costs while earning valuable industry credentials.

SCCC faculty and program coordinators are highly conscientious about student affordability. Instructors consistently evaluate course materials, software, and textbooks to identify the most effective and cost-efficient options. Additionally, the college leverages grant funds to provide essential equipment and technology—such as computers, welding kits, and program-specific tools—to students who may not otherwise be able to afford them.

Each fall, SCCC initiates its annual fee approval process. Faculty review all existing fees to determine which should be retained, modified, or removed for the upcoming academic year. Fees are finalized by October 1 and remain locked for the following year to ensure transparency and predictability. However, in alignment with SCCC's student-centered approach, if a fee or cost decreases midyear, the college implements the lower rate to benefit students as soon as possible.

This structured review process—combined with foundation, grant, and K-12 partnership support—demonstrates SCCC's ongoing commitment to affordability, access, and student success in career and technical education”

WASHBURN INSTITUTE OF TECHNOLOGY

“The leadership of Washburn Tech works diligently to lower student costs, using grant and budgetary funds to purchase classroom sets of both toolkits and textbooks. Further, included in our fees for certain programs are personal items such as steel toe boots that students need to have to participate in the program. However, we will provide items like this if needed via our care closet which also provides items such as food and personal care products on an as needed basis.

In addition, Washburn Tech is fortunate to be able to offer a multitude of scholarships that students can receive. For instance, all Shawnee County high school students who have been a resident of Shawnee County for at least two years receive up to \$750 per year for their technical programs (\$375 per Fall and Spring semester) to help offset course costs.

We also work with multiple school districts that help pay the cost of students attending. However, every school district is different, so these fees are submitted in the AY2026 fees/costs.”

WICHITA STATE UNIVERSITY CAMPUS OF APPLIED SCIENCE

“At WSU Tech, tuition and fees are determined through a tiered model designed to ensure affordability, transparency, and alignment with the actual cost of program delivery. Each program is placed within one of eleven tuition tiers based on a five-year operational cost analysis that factors in instructional expenses, materials, equipment, and facility needs. Academic deans and vice presidents review these tiers each year to assess whether “pass-through” fees, such as testing, flight, tool, or bookstore purchases are adequately covered by the state’s Excel in CTE reimbursement or should instead be communicated to students as direct costs. This review occurs prior to the submission of the institutional budget and the opening of enrollment each year.

WSU Tech’s Foundation and industry partners also offer scholarships that help offset expenses such as industry-recognized certification testing and tool purchases for students in high-demand programs like Aviation Maintenance. These awards provide an estimated savings of up to \$5,000 per student, with eight recipients each year. Students are not charged for their first attempt at most certification exams; however, re-testing fees are the student’s responsibility and are reflected in the AY2027 fees and costs. The college maintains standard policies for the replacement of lost or damaged equipment, though such costs are rare and therefore excluded from the annual fee submission.

WSU Tech also partners with several USDs that cover textbook costs either partially or in full. Because this support varies by district, textbook fees have been submitted for all programs to reflect what a student would pay if purchasing through the college bookstore. Students may choose to obtain textbooks from alternative sources, which may have different costs. These textbook fees are included in the AY2027 fees and costs submission.”

WSU Tech UAS

Employer and Industry Engagement

Purpose

This report summarizes employer engagement and student post-program pathways for the WSU Tech Unmanned Aircraft Systems (UAS) program that was established in Fall 2021. The emphasis is on employer alignment, industry exposure, and continued education pathways typical of the UAS workforce pipeline.

Program Overview: UAS Associates and Technical Program

- Program Established: Fall 2021
- Complete 2 year AAS program
 - New cohort every Fall semester
 - Course are offered at NCAT Campus and Maize Career Academy
- First unduplicated graduated student: 2022
- Unduplicated Graduates: 12 (2022 – 1, 2023 – 7, 2024 – 4)
- Lifetime Enrollment YTD: 88 students or 2,556 credit hours
- Graduate Placement for unduplicated graduates:
 - Employed in a related field: 5
 - Continuing Education: 7
- FAA Part 107 (Small Unmanned Aircraft Systems) Licenses: 65

Industrial Training Program

- Industry Trainings Completed YTD since 2023: 14
 - Lifetime Enrollment YTD: 78 students or 2,184 contact hours
 - FAA Part 107 (Small Unmanned Aircraft Systems) Licenses: 78
 -

Employer & Industry Engagement

The UAS program maintains active engagement with employers and partners through internships, industry advocacy teams (IATs), research collaboration, industry training, operational demonstrations, and workforce alignment. The following organizations represent entities where students have worked, are currently working, participated in industry training, or involved with our Industry Advisory Team:

IAT Members

- Kansas Department of Transportation
- Federal Aviation Administration
- Global Aerial Management Group
- TANA Ag Solutions
- Genus Innovations
- General Atomics
- Dreiling Aviation
- Crossflight Training Solutions
- Wichita State University
- Kansas State University

Employers

- Derby Police Department
- Sentera
- Central Life Sciences
- Benesch
- WSU-Tech

Industry Training

- Wichita Police Department – 8 trainings
- Derby Police Department – 2 trainings
- Sedgwick County Fire Department – 3 trainings
- Wichita State University – NIAR – 1 training

Summary

The UAS program demonstrates strong alignment with employer needs and continued education pathways, supported by active engagement with public safety agencies, aerospace and defense organizations, commercial UAS operators, public service, engineering firms, and higher-education partners. These outcomes reflect the current career status, but not the long-term career trajectory or future opportunities.

CLOUD COUNTY COMMUNITY COLLEGE

DRONE PILOT

List of occupations that include drone-related skills, limited to positions within Cloud's service area. All occupations were identified using O*NET under the Drone Pilot skill. <https://www.onetonline.org/search/task/?s=Drone+Pilot>

Remote Sensing Scientists and Technologists

UAS-COW

This information was compiled from Cloud's UAS instructor, Wing Cheung from Palmore College, who has been the lead on developing SOC codes for the 2028 O*net update. Cloud's recommendation is to use the 5 SOC codes that were modified in 2021. The job titles of UAS Operator and UAV Operators are tied to Electro-Mechanical and Mechatronics Technologists SOC code, 17-3024, which Cloud disagrees with.

The information below gives the framework for how this is currently being approached. Local partners which have hired or worked with Cloud's students would like to see training in GIS, Data Analysis, NIST (National Institute of Standards Training for Skill development in manipulating drones), and Mission Planning.

In addition, FFA certificates which are mandatory for employment depending on specific tasks to be completed.

- FAA Part 107 Remote Pilot Certificate
- FAA Part 135 Certificate (Drone Delivery)
- FAA Part 137 Ag Spraying Certificate
- FAA Part 108 Certificate (soon to be approved Beyond Visual Line of Sight BVLOS)

Nature of Work Performed

- Proposed Occupation Title: 53-201x - Drone Operators
- Pilot, navigate, or monitor remotely piloted aircraft systems. Pre/post-flight operations and planning. Requires Remote Pilot certificate or other related FAA certification. May manage cargo or payload, capture and analyze remotely sensed data, perform research and development, maintain aircraft, and conduct test or training flights.
- Includes farm workers and laborers, surveying and mapping technicians, and camera operators, television, video, and film who primarily conduct remotely piloted missions.
- Excludes "Airline Pilots, Copilots, and Flight Engineers" (53-2011), "Commercial Pilots" (53-2012), "Aircraft Mechanics and Service Technicians" (49-3011), and "Avionics Technicians" (49-2091).
- Illustrative examples: Commercial Drone Pilots, UAS Operators

Tentative Occupation Titles

- Aerial Drone Pilot
- UAS Drone Pilot
- Uncrewed Aircraft Systems Operator

Tasks (as of 4/20/2023)

- Use instrumentation to pilot aircraft when conditions warrant.
- Start, operate, and remotely pilot aircraft to transport payload according to flight plans, regulations, and procedures.
- Monitor propulsion system operation, energy consumption, and functioning of aircraft systems during flights.
- Check aircraft prior to flights to ensure that the propulsion systems, controls, instruments, and other systems are functioning properly.
- Consider altitude, aircraft weight, fuel/power supplies, and weather conditions in planning a flight.
- Obtain authorization for flights in controlled airspace.
- File instrument flight plans with air traffic control so that flights can be coordinated with other air traffic, if applicable.
- Check payload to ensure that it has been loaded or installed correctly.
- Plan flights according to government and company regulations, using aeronautical charts and navigation instruments.
- Choose routes, altitudes, and speeds that will provide the safest and most efficient flights.
- Coordinate flight activities with ground crew members and brief crew members of flight, safety, and test procedures.
- Make changes in altitudes or routes as circumstances dictate.
- Maintain flight records, such as flight times, altitudes flown, and equipment considerations.
- Supervise other crew members.
- Instruct other pilots and student pilots in aircraft operations and organization regulations and procedures.
- Perform minor aircraft maintenance and repair work or arrange for major maintenance.
- Perform maintenance test flights to determine effectiveness of equipment and prepare flight evaluation reports.
- Plan, formulate, conduct, and document test flight activities and test schedules.
- Safely pilot aircraft at low altitudes to complete specific tasks.
- Check the flight performance characteristics of new and experimental aircraft.
- Perform additional crew duties, as required.
- Coordinate flight activities with air traffic control, as required.
- Transport of passengers or cargo

Detailed Work Activities as of 5/04/2023)

- Operate aircraft safely.
- Inspect aircraft and aircraft components.
- Monitor propulsion system operation.
- Choose the optimal transportation routes and speeds for a specific task.
- Communicate with others to coordinate aircraft movement.
- Review work orders or schedules to determine operations or procedures.
- Inspect payload and cargo to ensure they are properly loaded and secured.
- Resolve issues affecting mission operations.
- Plan mission operations.
- Assist others during mission-related emergencies.
- Coordinate flight control or flight management activities.
- Record operational details of missions.
- Train flight, transportation, or mission support personnel.
- Direct passenger, payload, or cargo transport activities.

- Evaluate performance of applicants, trainees, or employees.
- Coordinate maintenance activities.
- Ensure aircraft is in good working condition.
- Test performance of aircraft equipment.
- Conduct pre/post-flight checklists.
- Manage data collection or payload.

Associated Job Titles

"3. Job titles. What job titles are commonly used by workers in this occupation? Are these titles unique to the proposed occupation? Are titles listed in the Direct Match Title File actually in use? Are there other titles that should be included in the file?"

- Commercial Drone Pilot
- Commercial Drone Operator
- Commercial Drone Technician
- Drone Pilot
- Drone Technician
- Unmanned Aerial Systems Operator (UAS Operator)
- Unmanned Aerial Systems Pilot (UAS Pilot)
- Unmanned Aerial Systems (UAS Technician)
- Unmanned Aircraft Systems Operator (UAS Operator)
- Unmanned Aircraft Systems Pilot (UAS Pilot)
- Unmanned Aircraft Systems Technician (UAS Technician)
- Unmanned Aerial Vehicles Operator (UAV Operator)
- Unmanned Aerial Vehicles Pilot (UAV Pilot)
- Unmanned Aerial Vehicles (UAV Technician)
- Urban Air Mobility Operator (UAM Operator)
- Urban Air Mobility Pilot (UAM Pilot)
- Urban Air Mobility Technician (UAM Technician)
- Advanced Air Mobility Operator (AAM Operator)
- Advanced Air Mobility Pilot (AAM Pilot)
- Advanced Air Mobility Technician (AAM Technician)
- Remote Pilot
- Remotely Piloted Aircraft Operator (RPA Operator)
- Remotely Piloted Aircraft Pilot (RPA Pilot)
- Remotely Piloted Aircraft Technician (RPA Technician)
- Remotely Piloted Aircraft Controller (RPA Controller)
- Unmanned Aircraft Operator (UA Operator)
- Unmanned Aircraft Pilot (UA Pilot)
- Unmanned Aircraft Technician (UA Technician)
- Aerial Camera Operator
- Drone Camera Operator
- Remote Camera Operator
- Unmanned Aerial Camera Operator
- Remotely Piloted Aircraft Camera Operator
- Sensor Operator
- Regional Air Mobility Operator (RAM Operator)
- Regional Air Mobility Pilot (RAM Pilot)
- Regional Air Mobility Technician (RAM Technician)

Technology Skills

- Aviation mission pre-planning software
 - Example: Foreflight, Flightradar 24, flight aware, UAV forecast, DroneDeploy, AviationWeather.gov
- Airspace and authorization software
 - Example: Aeronautical charts, FAA Facilities map, Skyvector, AirNav, TFR.faa.gov, Aloft, B4UFLY
- Software for autonomous flight
 - Example: Litchi, DroneDeploy, ArduPilot Mission Planner, Pix4D
- Software for manual flight
 - Example: DJI GO, DJI pilot, Skydio, Autel Explorer
- Data Analytical or scientific software
 - Example: Pix4D, ArcGIS, LP360, Agisoft
- Flight and equipment fleet management software
 - Example: AirData, VISTA, OEM firmware, Drone Logbook
- Project deliverables
 - Example: Microsoft Office, Adobe Creative Cloud, ArcGIS, Google Earth, DroneDeploy, Pix4D
- Flight simulation software
 - Example: Zephyr, Realflight, DJI Flight Simulator

Tools Used

- Aircraft flight simulators or trainers
 - Example: Flight simulators
- Ground safety equipment
 - Example: "Landing pad, safety cones, Reflective vest
 - Hard hat, Lighting equipment"
- Support equipment
 - Example: Ground control target, memory cards, rangefinders, Anemometer, Calibration target, GNSS, maintenance parts
- Ground control station
 - Example: Mobile devices and tablets, Flight controllers, VFR headsets, Laptop, Mobile Command Center, External Monitors
- Unmanned aircraft system
 - Example: Fixed wing, Rotary wing, VTOL, Lighter than air
- Power and propulsion equipment
 - Example: Power generator, power inverter, battery charger, hydrogen tank, batteries
- Sensors and payloads
 - Example: RGB camera, LiDAR scanners, multispectral sensors, IR sensors, sonar, package delivery system, agricultural spraying apparatus, environmental monitoring sensors

Licensing

Part 107 Remote Pilot Certificate from the FAA is usually required for the missions undertaken by workers in this occupation. Listed below are some additional licenses from the FAA, other agencies, and private accreditation bodies that may be required for specified workers within this occupation. For example, drone package delivery operators need the FAA Part 135 license, and public safety agency employees using drones for their operations typically need the FEMA ICS certificates.

- AUVSI TOP
- NIST
- USI Certification
- Part 137
 - Agricultural
- Part 61
 - Flight Instructors
- Part 135

- Package Delivery
- Part 107
 - UAS
- International Standard for Business Aircraft Operations (IS-BAO) Remotely Piloted Aircraft Systems (RPAS) Certification

Education & Training

- Education and training
 - Part 107 knowledge areas
 - UAS-CTI training objectives and goals
 - Flight training
- Schools or training providers
 - High schools
 - Post-secondary vocational and technical schools
 - 2yr and 4yr Colleges
 - Private training organizations
 - Governmental agencies
- How long is the education?
 - 30-50 hours of flight hands-on training
 - 40 hours of Part 107 preparation
- Degrees or other credentials
 - Part 107 Remote Pilot Certificate
- Specific education and training programs
 - UAS-CTI Schools
 - USI
 - Pilot Institute
 - Private employers

Professional, Trade Association, or Labor Unions

- AUVSI
- AMA
- Commercial Drone Alliance
- Airborne International Response Team (AIRT)/ Drone Responders
- National Institute of Standards and Technology (NIST)

Types of Employers

- Public safety (e.g. fire suppression, forensics, search and rescue, patrol and surveillance)
- Agriculture
- Insurance
- Mapping and surveying
- Construction
- Real-estate
- Filming and photography
- Inspection (e.g. energy, infrastructure, and construction)
- Logistics/package delivery
- Inventory/asset management
- Journalism
- Environment and resource management
- Archaeology
